

FACT SHEET | DealRoom

Faster, smarter and more secure transactions

M&A due diligence can be particularly complex and stressful for everyone involved and the last thing you want to worry about is technology. Brainloop DealRoom was specifically designed to make the extremely secure exchange of information in M&A easy and effective.

Whether you are raising funds, acquiring or selling a company, Brainloop DealRoom - a secure platform to share and collaborate on your critical business information - streamlines your deal process and makes it faster, more secure and stress free. Brainloop is distinguished by its advanced features, including integration into MS Office and secure applications for all mobile devices as well as high levels of security, which is almost invisible to end-users so they can continue to work as normal. Security measures include strong encryption, watermarking, operator and provider shielding and local data hosting of your choice in multiple highly secure data centres across the EU.

HIGHLIGHTS FOR DEALMAKERS

- > Start today – deal room up and running in minutes after signing a contract
- > Transparent pricing structure – no worry about pages - get GB of data at fixed price
- > Work Natively – integration into MS Office and Outlook
- > Dynamic data – documents in native format for posttransaction
- > Automatic PDF conversion

HIGHLIGHTS FOR BIDDERS

- > Works first time on any Browser – HTML 5 - no plug-ins needed
- > Secure applications for all mobile devices
- > Easy and intuitive to use
- > Q&A tool for efficient response to upcoming questions
- > Multi-language support

„Brainloop provides a secure dataroom that is both easy and intuitive to use for all types of users, while enabling tailored security and permission settings. It has already been proven in multiple transaction environments.“

Andrea Büssenschütt, Consultant Deloitte Financial Advisory GmbH, Deloitte Austria
