

## ***Features and Benefits***

- Urine Off® is the #1 Veterinarian recommended product for urine stain and odor removal.
- Professional pet trainers use Urine Off® to remove urine that contributes to undesirable territory-marking behavior.
- Endorsed by veterinarians, animal trainers, cat behaviorists, carpet cleaners, and flooring installers.
- Urine Off® has been awarded USDA BioPreferred<sup>SM</sup> designation as a USDA Certified Biobased Product.
- Official show-ring cleaning agent for Crufts, the world's largest dog show.
- Urine Off® has been endorsed by Interface Carpet.
- Awarded the Seal of Approval from the Carpet and Rug Institute (CRI), the U.S. Carpet Authority.
- Urine Off® is a revolutionary biotechnology product that eliminates urine odor and stains at the source, permanently.
- Urine Off® uses a combination of naturally occurring micro-organisms and their enzymes to digest the uric acid crystals (which produce urine's pungent aroma) as well as urea (the sticky substance in urine) and proteins (which promote pathogen growth).
- Urine Off® works on both hard and soft surfaces. Works on old set-in stains as well as fresh deposits.
- Urine Off® is non-toxic, non-pathogenic and biodegradable. Totally safe for use in any environment.
- Complete line of premium products to deal with pet waste.
- Globally respected brand name sold in over 70 countries!

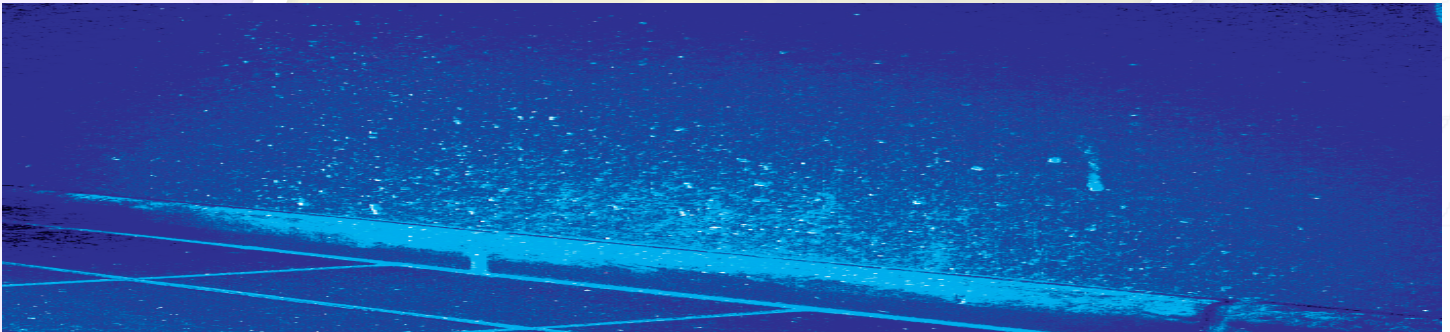

## URINE IS THE PROBLEM

Attaining and maintaining a truly hygienic condition in kennels and other pet facilities has become a major focus of the industry. Areas that have been soiled – especially with feces and urine – can serve as breeding grounds for disease and infection. Some contaminants are extremely difficult to remove once they have dried, and, in the case of urine, have formed a nearly insoluble crystalline structure that binds organic soils to the surfaces.

Urine is comprised of urea, uric acid and urochrome. It has proven to be one of the most challenging substances to permanently eradicate. Typical commercial cleaners remove urea and urochrome without destroying the uric acid crystals. These insoluble crystals remain, and can be reactivated by moisture, thus reinvigorating powerful odors. The majority of commercial cleaners which promise to remove the odors associated with urine simply mask the smell or remove odors temporarily.

Most commercial cleaning compounds work through the process of either sanitization or disinfection. Both processes use chemicals, such as ammonia or peroxide, to kill microorganisms. In order to do so, the cleaning substances must be toxic – not only to germs, but also to humans and animals!

*Using the Urine Finder Black Light, urine is shown on a baseboard at a kennel.*

## URINE OFF IS THE SOLUTION

In contrast, Urine Off works by “eating” uric acid and proteins, removing the growth environment needed by germs. Urine Off permanently eradicates odors and stains by destroying the insoluble uric acid crystals. Surprisingly, even old stains and their accompanying recurrent odors can be eliminated using Urine Off. Originally developed to abolish the odors caused by urine and feces in the poultry industry, Urine Off uses bio-enzymatic technology to consume the uric acid crystals, the primary source of odors. Made in the USA, Urine Off is a USDA Certified Biobased Product, and also carries the Carpet and Rug Institute Seal of Approval.

Urine Off is available for the pet and vet trade in many convenient sizes. In order to better serve kennel operations, veterinary clinics, pet stores, groomers and other end users, Urine Off has developed the new Fill-Pro Bulk Liquid Dispensing System: a simple refillable container that lowers the cost of Urine Off by using a concentrated formula to avoid shipping heavy water. The Urine Off Pet Professional Concentrate guarantees removal of uric acid crystals and the elimination of stains and odors caused by urine. The Fill-Pro dispensing carboy is the easiest way to handle Urine Off cleaning fluids for daily cleaning. Its translucent design allows for quickly checking the content level, and its five gallon capacity is ideal for high volume users. Refilling is easy as well: simply pour one jug of concentrate into the durable carboy, then add water to make five gallons of premium professional ready-to-use solution.

Premium Stain & Odor Technology

# Cat & Kitten Formula

Urine Off Cat Formula, the #1 Veterinarian recommended product for urine odor and stain remediation, breaks down dried uric acid crystals – the primary trigger mechanism for repeated marking by cats. Not a perfume or cover-up, it actually eliminates all three major components of cat urine odor and stains.

Urine Off is the urine odor and stain remediation product that carries the “Seal of Approval” from the Carpet and Rug Institute, the U.S. Carpet Authority. Urine Off is the official show-ring cleaning agent for Crufts, the world’s largest dog show, and is safe on all surfaces – even hardwood floors. Urine Off products meet strict EU standards for bio-degradability and are safe to use around pets and humans.

**Urine Off Cat Formula  
with Carpet Injector Cap**  
SKU: PT6053 - 12/case  
Size: 32 oz

**Urine Off Cat Formula  
with Carpet Injector Cap**  
SKU: PT6061 - 12/case  
Size: 16 oz

**Urine Off Cat Formula  
with Sprayer Top  
with Induction Seal**  
SKU: PT6000 - 12/case

# Equine Formula

Urine Off Equine Formula uses a revolutionary combination of naturally occurring enzymes and micro-organisms to digest the uric acid crystals, urea, and urochrome in urine that not only causes discomfort for humans, but poses health risks for horses. The urea is converted to ammonia in wet horse bedding, stalls, and trailers, which can lead to serious respiratory problems for the horses. In stalls where straw, shavings, and woodchips are used, the build-up of ammonia can be even greater. The ammonia can seep into the walls and floors and continue to be released into the stalls, even after the bedding has been removed.

This can be extremely damaging to the eye membranes, sinuses, and respiratory tract of a horse. It slows the mucociliary apparatus, which is responsible for trapping and removing microorganisms and debris from the respiratory tract, and damages the ciliated cells, which filter out harmful dust particles and prevent the build-up of mucous. Anything that damages these functions can increase the chance for contracting disease exponentially.

Urine Off Equine Formula is perfect for the harsh realities of horse urine. It is formulated for removing odors in trailers, stalls, tack, and personal clothing. By removing the uric acid crystals that cause the corrosion and deterioration of horse trailers, Urine Off extends the life of these trailers.

Urine Off Equine Formula is packaged in a convenient gallon and reusable fill-pro container. The equine one gallon concentrate make 5 gallons of ready to use cleaning solution.

## TWO GREAT PRODUCTS — FIVE EYE-CATCHING DISPLAYS!

Red wine spilled on carpet and tablecloths...

Coffee drips on white shirts or upholstery...

These stains have long been considered difficult (if not impossible!) to remove. Now, Bio-Pro Research is proud to introduce the solution to these cleaning dilemmas: WineOFF and CoffeeOFF!

With our specially developed formulas of friendly bacteria and enzymes, WineOFF and CoffeeOFF actually “eat” the stains, leaving your clothing, table linens and carpeting stain-free. WineOFF and CoffeeOFF are also effective on many food residues and other organic stains.

Made with nature-based, non-toxic ingredients, WineOFF and CoffeeOFF are safe to use around people and pets. The biodegradable ingredients are environmentally friendly as well.

# CoffeeOFF® WineOFF®

***A coffee stain on the blouse or tablecloth... or glass of red wine spilled...  
No problem for WineOFF® and CoffeeOFF®***

These spots usually occur at the most inopportune time and are difficult to remove! Usually treated with harsh chemicals and bleaches like hydrogen peroxide, Bio-Pro Research developed a safe and effective USDA Certified Bio-Based, BioPreferred solution to this age old problem that is safe and effective.

The new WineOFF® and CoffeeOFF® spray pens which are designed for a brief case or purse are perfect for people on-the-go and are TSA approved for airline travel. The 118ml spray bottle is great for larger applications and ideal for refilling the spray pens.

Utilizing natural microbiology, Bio-Pro unleashes an army of billions of stain consuming soldiers that work for food! They actually consume the stains naturally without harming fabrics like bleaches do. They are so safe that they have been USDA tested and Certified BioPreferred and carry the testing certification of the Carpet and Rug Institute (CRI) the industry standard for carpet materials testing.

In addition to wine and coffee, WineOFF® and CoffeeOFF® are also effective on many other organic deposits.

The ingredients of WineOFF® and CoffeeOFF® are bio-based and completely non-toxic and safe for use around people and pets and great for the environment too.

Bio-Pro Research products are distributed in over 80 countries and have earned the reputation of "Finally Something That Actually Works!".

# Small Animal Formula

Urine Off Small Animal Formula, the #1 Veterinarian recommended product for urine odor and stain remediation, breaks down dried uric acid crystals – the primary source of odors caused by small animal urine. Not a perfume or cover-up, it actually eliminates all three major components of small animal urine: urea, uric acid, and urochrome. It even works on ferret urine, considered by many to be one of the most potent odors caused by small animals.

Urine Off is ideal for cleaning cages and areas where small animals are kept.

Urine Off is the urine odor and stain remediation product that carries the “Seal of Approval” from the Carpet and Rug Institute, the U.S. Carpet Authority. Urine Off is the official show-ring cleaning agent for Crufts, the world’s largest dog show, and is safe on all surfaces – even hardwood floors. Urine Off products meet strict EU standards for bio-degradability and are safe to use around pets and humans.

#### Urine Off Small Animal Formula with Sprayer Top

#### Instructions

1. Shake well before using.
2. Use a Urine Off Urine Finder Light to locate odor causing deposits.
3. Always check an inconspicuous area for colorfastness.
4. Absorb fresh urine with absorbent pad or paper towel.
5. Application: It is essential to saturate the soiled areas just past the edge of the stain.
6. Allow Urine Off to work: Fresh deposits – a few minutes. Old stains – cover area with plastic and allow it to remain overnight. Remove plastic and air dry. Reapply Urine Off, allow it to remain for a few minutes. Old stains/deposits may require multiple treatments.
7. Remove residues with water.
8. Cages: Remove tray and spray with Urine Off. Allow to work for a few minutes, scrub, and rinse. Repeat if necessary to remove old deposits.

*Note: Store in cool location.*

# Yard Odor Eliminator

The Yard Clean Green Yard & Kennel Odor Eliminator is a concentrated formula designed to eradicate obnoxious smells caused by animal urine and feces.

The Yard Clean Green Hose-End Proportioning Sprayer is designed to automatically mix Yard Clean Green with water in an optimal solution. Simply fill the sprayer with Yard Clean Green, attach to a garden hose, and spray the area with the ideal mix to control odor.

Keep the yard, kennel, or "convenience" area fresh and clean-smelling with Yard Clean Green.
