

Maximo-as-a-Service Hosting in the Cloud

Maximo-as-a-Service (MaaS) is an annual subscription that provides customers with a secure, dedicated Maximo application via the Internet or “cloud” environment.

Why MaaS?

MaaS is a low maintenance affordable solution that offers high availability, security, and performance. This solution relieves the headache of maintaining Maximo and the hardware needed to run Maximo.

Our IBM Maximo-as-a-Service offering is bundled with the following features:

- **Maximo Help Desk Support.** Telephone support from Maximo experts during standard business operation hours. After hours support via web request or email.
- **Patching and upgrading Maximo.** The service includes the technical aspects of applying patches and upgrades to your Maximo environment.
- **High availability and high performing Maximo applications.** We will scale the solution to match your usage of Maximo. Furthermore, our service includes hardware refresh schedules to ensure peak performance.
- **MaaS Premier** includes one production instance and a second development instance that can double as the disaster recovery 'failover' instance. Additional instances can be purchased as an add-on service.

Added Value:

Because we provide the software and hardware required to host Maximo, cost is based on need and usage requirements – resulting in low costs and quick return on investment.

System administration support and upgrades are provided as part of the service. With our industry and Maximo expertise, you can be up and running quickly.

Infrastructure

Maximo-as-a-Service assures you the security, speed, and availability you require.

	<h3>Maximum Uptime</h3> <p>With its own fully redundant infrastructure, uptime is designed for 99.99% availability through multiple data centers and 24 x 7 monitoring.</p>
	<h3>Security and Protection</h3> <p>Secured in datacenters meeting the most stringent physical security standards, the infrastructure is secure from employees and the world. Antivirus software and managed operating system patching secure the servers.</p>
	<h3>Servers, Storage, Maintenance</h3> <p>VMWare enterprise high availability server cluster powered by current generation intel 6-8 core servers and enterprise grade fiber channels are included. Hardware is refreshed every 37 months to keep Maximo running at highest performance levels.</p>
	<h3>Speed and High Performance</h3> <p>A fiber network powers a low latency path over the internet to your production applicaiton.</p>

Bring IBM Maximo to the Cloud

You have options:

- ✓ No License? No Problem! There's no need to purchase Maximo licenses. MaaS includes access to Maximo on a subscription basis. You will always own the data you put into Maximo.
- ✓ Bring Your Own License (BYOL) Reduce costs and increase efficiency: If you already own Maximo® licenses, bring them to the cloud! Our cloud solution, provides an economical and secure alternative to hosting them in-house. Maximo® in the Cloud minimizes the maintenance and overhead associated with supporting Maximo®, so you can focus on your core business.
