To: Whom It May Concern:

From: Saunatec Inc

Re: Sprinkler head temperature ranges in a sauna.

Temperature settings for a sprinkler system **inside a sauna** should be set for **260 to 280 degrees Fahrenheit**, but Saunatec Inc. defers to all state and local codes.

Temperature settings for a sprinkler system outside the sauna room should be set for normal temperatures.

Sincerely,

Tracy Felder  
Saunatec Inc.  
Technical Support Manager
