

BWT Bio Water Technique Experience Sauna Reinvented

SIMPLICITY IS A GOOD THING

We have trail-blazed the sauna industry for almost one hundred years. We now introduce the only multilayered sauna experience on the market. A new dimension in modern sauna solutions. And it is handmade in Finland, as usual.

A SAUNA THAT CHANGES WITH YOU

The new BWT-ready sauna provides a multidimensional experience of pleasure and relaxation in true Amerrec fashion. Our patented technology incorporates a stainless steel water reservoir between heating elements (in the middle of the rock chamber) to introduce soft humidity to the sauna. A multitude of sauna experiences in one single and ingenious sauna solution.

ONE HEATER. MULTIPLE SENSATIONS

Indulge in a multilayered sauna experience. Enjoy your favorite sauna alone or share different experiences with others. With a BWT-ready sauna heater it is all possible. The flexibility of BWT opens up a number of opportunities for pleasurable sauna experiences that you can all enjoy.

BWT ENERGY EFFICIENCY

Keeping CO² emissions to a minimum and your pleasure at a maximum

Less wear and longer life protects your investment. The generally lower levels of heat used in a BWT-ready sauna from Amerec means less stress on the sauna room and hardware. Your sauna room will last longer and the simple engineering of BWT keeps technical maintenance to a minimum.

Faster warm-up time, same sauna sensation, but with a much lower energy consumption and less CO² emissions. With a BWT-ready sauna solution, you get the full sensation of heat in less time. Using the physical properties of steam, you get the sensation of heat in half the time compared to regular sauna.

BWT READY The BWT Heater Range

FONDA

HIMALAYA

LAAVA

THREE SAUNA TYPES FROM ONE HEATER.

BWT makes it all possible
