LD DAVIS INTRODUCES FOOD-GRADE PAPER STRAW ADHESIVE

December 6, 2019 Jenkintown, PA — LD Davis Glues & Gelatins introduces a food-grade adhesive solution for the growing U.S. paper straw manufacturing industry. This adhesive formula is direct food contact safe, biodegradable, compost-friendly, non-GMO and gluten-free. It is designed to hold up until end-of-use for cold and hot beverages.

As the demand from paper straws grows and businesses in the U.S. transition from single-use plastic straws to a biodegradable alternative, a U.S. manufactured adhesive solution was essential. The LD Davis technical team adds paper straw glue to their extensive line of natural, eco-friendly adhesives including gelatin-glue and water-based glues for manufacturing and packaging.

LD Davis is a global provider of glue and gelatin solutions that drives superior product performance for mid-to-large sized manufacturing companies.
