

Katapult is looking for a driven, passionate individual to demonstrate leadership, voice their opinion, and grow with an emerging firm. We are a dynamic company that will be achieving big things in 2017. If you're excited to be part of this unique opportunity and join a great team, we want to hear from you!

## Backend Developer

### PRAGUE HQ / REMOTE

Katapult's Back End Development Team is working not only on improving the company's product, but also on increasing their ability to deliver highly functional architecture. This is a long term vision founded on a number of practices — from encouraging individual autonomy and deep learning, to congratulating team members when they've done a great job. We want to continue to build a talented team of Back End Developers who will own their role, work hard to improve themselves, and encourage others to do the same.

Katapult is a white-label investor management software that enables companies to design, setup, and manage equity and debt investments and funds across multiple distribution channels including web, mobile, and social media.

### DUTIES AND RESPONSIBILITIES

- Creating controller / model code as requested by the senior developers
- Creating selenium tests and maintaining all tests in a QA environment
- Working with Front End Developers on heavier javascript work
- Attending progress meetings via Webex / Skype / Google Hangouts
- Communicating with team members via Slack, Basecamp, JIRA

### WORKING CONDITIONS

- Located in/willing to relocate to Prague. Remote work possibilities can be discussed.
- Interacts with the Katapult team in-person and online on a daily basis, and with clients when needed.

### WHAT WE'RE LOOKING FOR:

- 3+ years of experience bringing digital products to life (ideally in an agency or consulting environment). Proficiency with CakePHP or similar MVCs
- Understanding of Unit Testing and Selenium Unit
- Testing Strategies
- Good teamwork and shared code repository skills
- PHP, MySQL, jQuery, Amazon Web Services - Elastic Beanstalk
- Respond to customer feedback & testing
- Self-motivated and can work independently, while still excelling in a team-based environment
- Ability to communicate clearly and concisely with the Product team
- Familiarity with Google Apps, Basecamp, InvisionApp, and Slack
- University level bachelor's degree or higher
- 2+ years experience in back-end web development

#### **KATIPULT TECHNOLOGY STACK:**

- CakePHP & Laravel
- PHP
- Nginx
- Docker
- AWS Elastic Beanstalk
