

MAKING A CASE FOR DESKTOP AS A SERVICE

More organisations are moving to an always-on workplace allowing employees to work flexibly anytime, from anywhere.

Desktop-as-a-Service (DaaS) provides a secure, cost-effective, managed solution that gives your employees access to everything they need to be efficient and productive.

DaaS Adoption

Give Employees Choice

78% of business leaders agree that choice of device and flexible access improves user experience and productivity

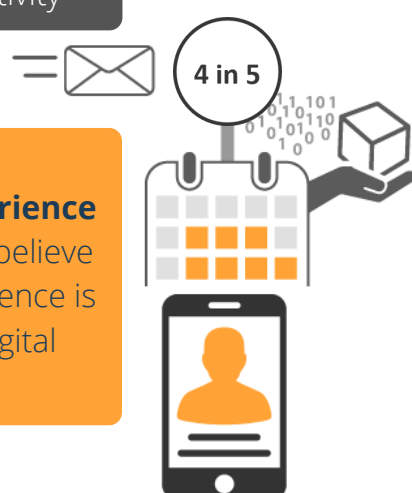

Simplify Access

47% of business leaders say that ease of access to the information needed is the highest contributor to employee engagement

Improve the Employee Experience

4 in 5 IT leaders believe employee experience is critical to their digital transformation

User Benefits

Choice of Device

A consistent experience from any device they use - Windows, Apple, Smartphones, Tablets, etc...

Reliability

If a device fails, the user can simply switch to a different device and pick up where they left off

Excellent User Experience

Access work, applications and on-demand self-service anytime, anywhere

Business Benefits

Fast Provisioning

Of desktops and applications for users, contractors, partners, suppliers, and even customers

Security

Decrease the risk of data loss due to device theft by storing data in the cloud

Cost Reduction and Control

Significantly reduce hardware capital expenditure and pay for only what you use

Boost Productivity

Reduced downtime and hardware issues means higher productivity

Key Drivers for IT

Centralised Management

- Simplified application management
- Reduced maintenance and simplified support
- Automated on-boarding and off-boarding processes
- Scalable solutions that flex with the business needs

Improved Security

- Centrally manage updates and patching
- Ensure data is stored securely and backed up
- Remote wipe in the event of device loss
- Improved resilience, business continuity and recovery

Efficient IT Service

- Shift from CapEx to predictable operational costs
- Guaranteed up-time and performance to an SLA
- Accelerated deployment of devices and applications
- Fully managed solution minimises user disruption

Fordway's, UK fully managed DaaS Service allows IT teams to focus on priorities while being confident that the organisation's desktop requirements are being met. Unlike other DaaS solutions, Fordway's services are customised to your exact needs and use cases and ensure continuous support post implementation.

Full support includes: 99.99% availability, 24x7 UK Service Support, managed applications including O365 integration, proactive incident management and service availability monitoring.
