

BLUE™ FOR CONSUMER BRANDS

Artwork management software to help you meet your unique challenges.

Business has never been more challenging for consumer products brands. Competition from retailers, global pressures and demanding consumers call for efficiency in the creation of the branded communications that are compelling and consistent wherever shoppers experience them.

BLUE understands. We've been a trusted partner in artwork management for over a decade and today we supply best-in-class solutions that directly address the challenges of consumer brands worldwide. **Read on.** ►

BLUE™ helps you meet your challenges. How?

We help you drive more effective development of branded and informational materials. **You can:**

- All but eliminate unnecessary asset recreation and searching time.
- Drive strict brand consistency.
- Enable highly efficient XML-based copy management and artwork creation with extremely tight tolerances.
- Organize and protect official versions and foster efficient proofing collaboration.

We help you drive more efficient deployment of materials across all artwork and production phases. **You can:**

- Positively impact timelines, stage-gates and deadlines, and the coordination of input from disparate divisions and locations.
- Reduce cycle times and overall cycles required for approvals.
- Store full audit trails of all project activity, which can be retrieved and exported easily.

What is artwork management software from BLUE?

- Enterprise software with six web-based modules:

Digital Asset Management

Copy Management

Workflow Management

Online Proofing

Business Intelligence (KPI Reporting)

Text Compare

- Full workflow analysis and process consulting.
- Fully validated installation and integration, plus training and support services.
- Seamless integration with company-side ERP systems to support the entire graphics-related workflow.
- Available on-site services for workflow optimization and brand asset management.

BLUE enterprise software fosters strategic and creative collaboration across a widely distributed brand team, crucial as brands expand their product portfolios and global footprint. This is proven to drive cost savings and measurable ROI at every process stage.

Talk to the experts at BLUE.

BLUE developed the first artwork management software more than a decade ago and now offers the most comprehensive software-and-services solution available.

Whether you require a single-country deployment or a global deployment with thousands of users, BLUE is proven to be scalable, reliable and capable of meeting the exacting demands of consumer brands.
