**One table that does it all!**

# Add or subtract features for even greater flexibility.

Introducing the **Dynatron DX1**  
ADVANCED TRACTION SYSTEM

Add **Light Therapy**, **Targeted Traction** and **Exercise** with the **Dynatron DX1** Advanced Traction System.

## Light Therapy –

By pre-treating with unattended Light Therapy using the Dynatron XP™\* Light Pad prior to beginning traction, the patient benefits from relaxation of muscle spasms, increased circulation, and relief of minor muscle and joint aches.

## Targeted Traction –

The DX1 automatically calculates and digitally displays the angle-of-pull, focusing distractive forces on specific areas of the spine.

20°

## Core-Strengthening Exercises –

Once pain has diminished, it is recommended that the patient begins an exercise program to strengthen supportive core muscles and improve flexibility.

\* Patent Pending

Also introducing the

**Dynatron TB**™

Subtract **Traction** and still enjoy **all the other features** of the **T4 table**.
