Take Control of Your Growing IP Portfolio

A growing portfolio promises greater value for your organization but also becomes costlier to support. Intellectual property management demands a disciplined and rigorous approach to capturing essential knowledge assets. From filing deadlines to office actions to maintenance fees, Wellspring's scalable IP software provides full life cycle management of patents, trademarks, and copyrights.
Gain Full Visibility

Wellspring provides a complete view of your portfolio including invention details, office actions, filing deadlines, maintenance fees, and more. The software's intuitive interface provides a clear view of your trademarks, copyrights, and patent details.

Save Time and Energy

Automate date reminders to ensure you meet critical deadlines. Easily find information you need and share across the organization. Wellspring's one-click nationalization tool enables you to quickly create multiple foreign filings from a single PCT record.

Run Powerful Reports

Eliminate hours of manual effort by automating docketing and compliance reporting. Keep an eye on your costs with Wellspring's robust financial reporting tools. Identify trends in your portfolio enabling you to make faster, better decisions.

Simplify Disclosures

Wellspring's online disclosure tools increase compliance and accuracy for invention submissions. Streamline the invention review process with online assessments and automated alerts.

"Wellspring's capabilities were essential in organizing the extreme quality of data necessary to coordinate IP interactions. Our personnel in multiple countries now all contribute inventions and participate in the real-time development of the patent applications. We avoided unnecessary expenses of approximately $250K in 4 months."

—IP Portfolio Manager

Are You Prepared for Growth in Your IP Portfolio?

Go Pro: Beyond Spreadsheets and Ad Hoc Systems

Ad hoc systems such as spreadsheets, file-sharing sites, and shared drives simply do not scale with a growing portfolio. Filing fees are expensive but the true cost of IP management accrues from wasted time entering data, finding information, missed deadlines, and cumbersome reporting tools. Wellspring has helped clients manage portfolios ranging in size from 10 to 1,000 patents.

Capture IP Through Inventor Portal	• Streamline communication for inventors • Enable inventors to check status
Route and Access IP	• Automated alerts of new submissions • Review and accept submissions • Convert disclosure submissions into inventions
Prosecute IP	• Life cycle management for patents, trademarks, and copyrights • Set notifications when maintenance due, office actions, etc. • Integration with payment services
Licensing	• Complete oversight of agreements • Tracking of financial and non-financial terms • Create financial statements for licensing revenue
Reporting	• Schedule automated reports • Multiple formats of docket reports • Detailed reporting for patents and licenses
