

We have a bright idea; a new way of learning English

As a child learning your native language, you spent a year listening before you could speak. Much later, you practiced reading and writing. We believe that a natural approach to learning a language is the most effective method. With us, that is how you will learn to speak English. We are unique in what we do; we are Wall Street English.

I used to memorise things I'd never use in the traditional system, but now at Wall Street English I learn them in a relaxing and interesting way. I can feel my improvement.

-Min Hui, WSE Student for 5 months

By learning English the same way you learnt your native language – naturally – the Wall Street English Multimethod® learning system surrounds you with English used in real life situations. Supported by our CELTA qualified native English teachers, you quickly understand English and are able to communicate without translation and memorisation.

We will listen to you and create a personal course plan

We are open when you need us, 10am to 10pm, every day. We will invite you in for a private consultation at a time that is convenient for you. Upon entering our centre, you will meet your Course Consultant who will enquire about your previous learning experience, your learning problems and what your objectives are.

I would definitely recommend WSE to friends because you can upgrade your knowledge and learn fast, not like in the traditional method. And it's easier to absorb words and grammar this way! It's just worth it!

-Janice, WSE Advanced English Student for 6 months

After confirming your current English level, your Course Consultant will create a personal plan that is specifically designed to achieve your learning objective. Your learning plan is flexible, allowing you to adjust your study pace according to your personal and professional lifestyle. You will also be able to meet and talk with our students to get a real sense of the learning environment.

One size does not fit all. We tailor our courses to your needs

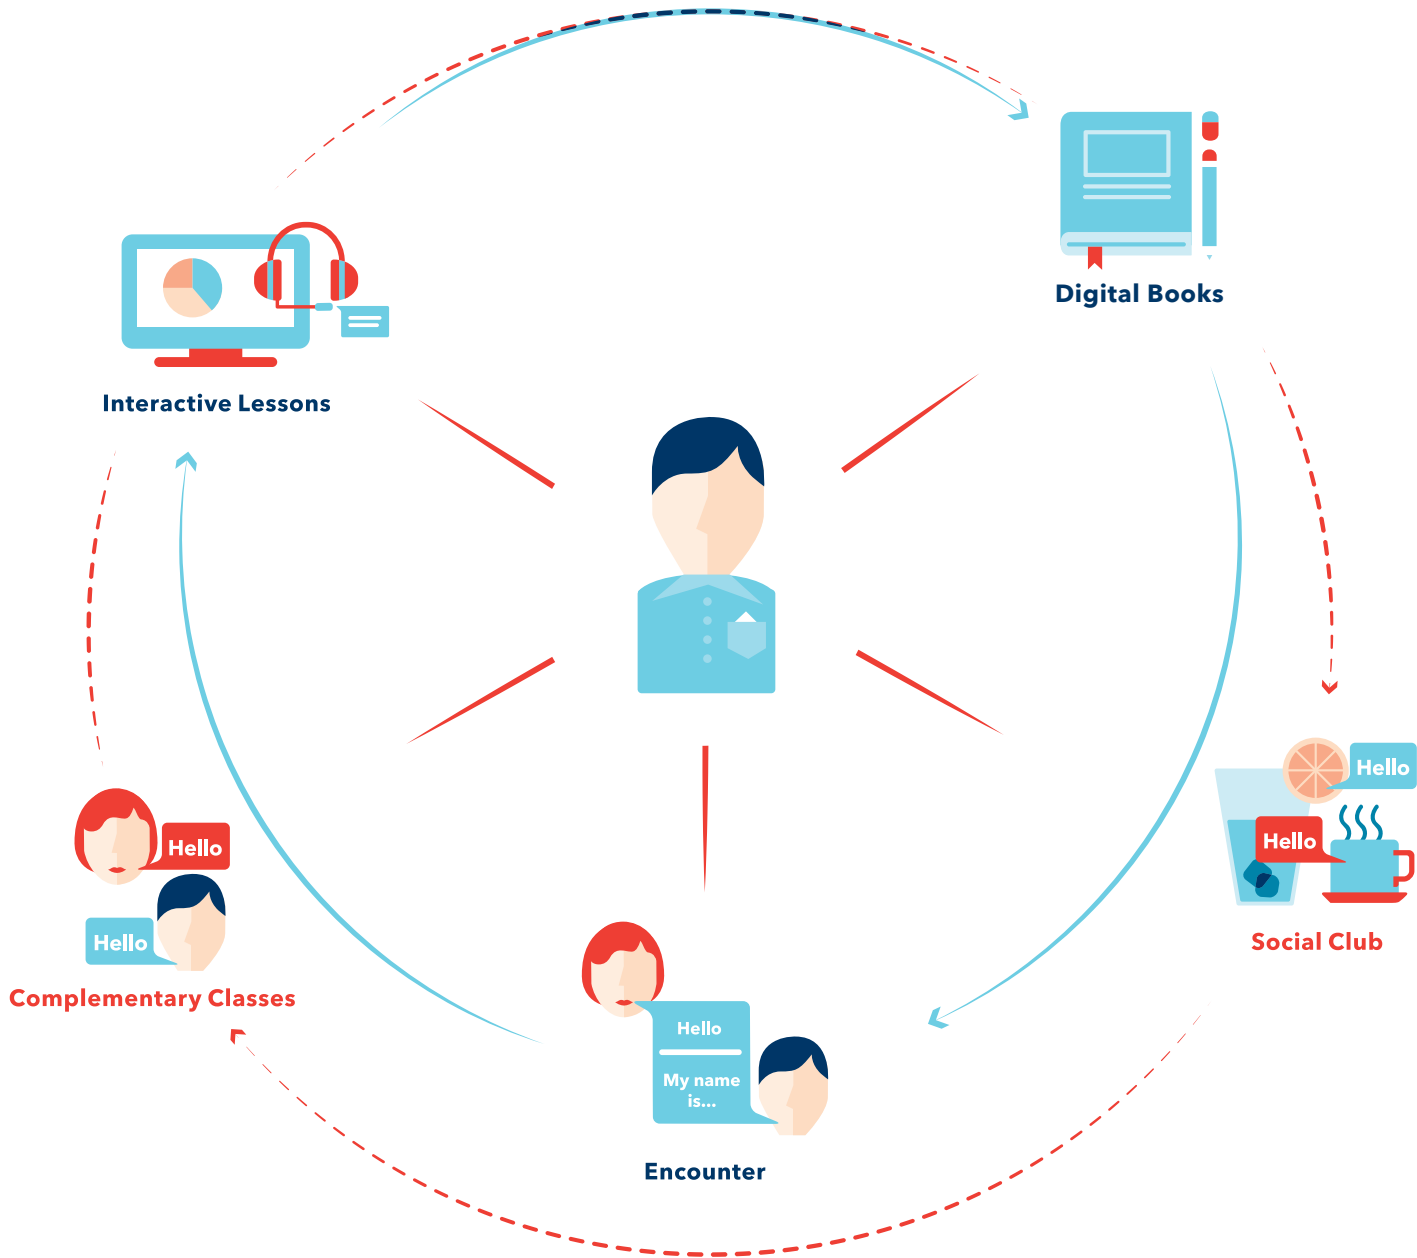

We are not just another language school. Choose a method that suits your lifestyle: by level, interest, time of day and frequency. Learning English for education, career or for personal use, our courses are designed to get you where you want to be. There are no missed classes at Wall Street English; all classes are repeated frequently.

Compared with a traditional way of learning, the online lessons provide a more realistic method than the traditional approach. My favorite part of WSE is that I can manage my own study schedule and book classes when it suits me.

-Fam Yoke Ling, WSE Student for 9 months

We blend interactive multimedia lessons with small size classes that are led by our experienced teaching team. Personal Tutors, who are responsible for your academic success, will regularly meet and discuss your progress. After each core class you will be given a detailed up-to-date progress summary, helping you understand how you are advancing.

We will provide you with a study plan that fits your objective and your schedule. The natural learning progression helps you build upon language already learnt, thereby increasing your fluency and confidence.

Interactive Multimedia Learning

Your interactive learning lessons, accessible anytime anywhere, will follow a natural learning sequence of listening, speaking, reading and writing. You will be introduced to new vocabulary, grammar structures, interviews and travel logs from around the world. As your level of English increases, you will be exposed to more complex language usage.

Digital Books

Our unique Digital Books offer interactive lessons, consolidating your confidence and fluency. As an integral part of your learning, which you can access either online or offline, you will receive immediate validation of your studies. You can even send your work to a friend, a colleague or a teacher to review and pass feedback.

The Encounter Class

As part of our core learning experience, the Encounter class is our 'quality control class'. In an average class size of 2 students, you will be asked to demonstrate your learning in a variety of class activities. Our qualified and experienced native English teachers provide individual feedback, with an emphasis on your fluency and usage. At the end of the class, you will be graded and be given specific comments on your progress.

The Social Club Class

Learning a new language is not easy, and you may feel shy when speaking English; that's why we created Social Clubs. The objective of the Social Club is to learn to enjoy speaking English. In a relaxed and social environment, you will engage in communication with students of your learning level.

The Complementary Class

With the aim of increasing your fluency and confidence, the Complementary Class is structured to help support the natural learning process in a friendly, relaxed and communicative environment. Taught by highly qualified teachers, with a maximum of 8 students per class, you will have plenty of time to practice your English.

We guarantee your results. Period

Wall Street English is the global leader in English language training for adults. Alongside renowned brands such as Longman, Penguin Books and The Financial Times, Wall Street English is exclusively owned by Pearson, the leading global education company.

With over 42 years of teaching English, spread across 30 countries and regions, throughout more than 450 centres, we stand by our promise to deliver. Uniquely, we guarantee your results.

Wall Street English's curriculum design, development, implementation, and quality control of teaching methods is ISO Certified. As part of our commitment to efficacy and transparency, Wall Street English course levels have been formally approved by University of Cambridge ESOL Examinations, and aligned to the industry leading Common European Framework of Reference.
