# Cooper Can Outsmart Yellow Jackets

## Who Am I?

Yellow Jacket

I am a very important insect... I am a Yellow Jacket. I eat other insects that damage our farms, fruits and vegetables. But, if my nest is located at your home, I can sometimes be a problem. You will see me and my friends in the mid-summer through the fall. My nest can be in the ground, in a tree or even inside a wall in your home. My mom, the Queen, lays all of the eggs for the family. We live in a nest and I have thousands of sisters living with me. I love

sweets, especially soda, and I also eat food which is why you will see me wherever there is food, soda, juice or other yummy things.

## How Does Cooper Outsmart Yellow Jackets?

Cooper Pest Solutions has developed a unique program to contend with yellow jackets that fly around the home. You will see the traps that Cooper uses in places like Home Depot®, but Cooper has taken the use of the traps to another level. Our trapping program was specially designed by entomologist and owner, Richard Cooper. The program is nationally recognized and can be seen at Waterfront Park in Trenton NJ, the Multiple Sclerosis 150 mile ride from Cherry Hill to Ocean City, NJ in addition to many public festivals and events throughout New Jersey.

Along with trapping, Cooper also takes care of yellow jacket nests that are established in the ground or in the walls of homes. Our treatments are precise and are aimed directly at the nest. In the event that you find a nest, call our experienced customer service representatives and we can solve your problem the same day.

## About Cooper

Cooper Pest Solutions is a family-owned business that residents and businesses have trusted since 1955. With our team of two entomologists, numerous environmental specialists and a licensed sanitarian, we develop unique programs that separate us from the rest of the pest control industry. From maintenance and prevention services to environmentally-conscious programs, call Cooper and find out why.....

Bugs are smart... We're Smarter™
