

Our Rodent Exclusion Service Eliminates and Prevents Rodents from Entering Your Home!

What parts of your home can we secure against rodents?

- 1 Attic, turbine and gable vents
- 2 Roof returns and plumbing vents
- 3 Gaps between exterior walls and roofing fascia
- 4 Dryer and oven vents
- 5 Foundation grates and pipe openings
- 6 Garage door opening

If you experience recurring problems with mice, squirrels, or other rodents getting into your house, a permanent (and highly recommended) solution is available from Cooper Pest Solutions! Since rodents can squeeze into the tiniest of places, older home structures often have many gaps that rodents find very attractive, and this is how they enter your home.

At Cooper, our exclusion services will provide you with peace of mind knowing that our corrective solution keeps the rodents out and your family safe since a mouse or rodent infestation is not something to be taken lightly. Not only do mice and rodents carry diseases that can be harmful to humans if left uncontrolled, they will also chew throughout your home, further endangering you and your family.

Our Rodent Exclusion Service Eliminates and Prevents Rodents from Entering Your Home!

Our Exclusion Program works in three easy steps

1. Our pest experts will perform a thorough inspection to identify the rodent issues at your home and we will create a customized plan to remove them and keep them out.
2. We will take care of your current pest issue.
3. We will exclude these pests from entering your home in the future. Our dedicated exclusion technicians will conduct trapping and wire mesh installation for low-lying areas. Perform sealing, capping, and metal flashing installations on the roof and in the crawlspace. Other solutions such as gutter guard may also be included for an additional charge.

Our Residential Rodent Exclusion Service Includes:

- Utilizing door sweeps placed on garage doors where open gaps are visible
- Sealing exterior cracks in foundation walls to prevent rodent entry
- Closing all open voids around drain pipes and conduits both inside and outside of the home
- Securing roof and attic vulnerabilities against rodent and pest entry

We exclude the following pests: Mice, Rats, Squirrels, House Mice, Deer Mice, and Field Mice
