# Enjoy a Bite-Free\* Yard All Summer

Our Mosquito Free Program will eliminate mosquito populations all summer long at your home. Enjoy the outdoors and take back your yard from mosquitoes this summer!

## Follow these steps to get a bite-free yard this summer:

- Step 1:** Call Cooper Pest Solutions and a representative can give you a **FREE** no-obligation quote for a fixed price all season without coming to your residence (in most cases).
- Step 2:** A technician will treat your property every 3 weeks beginning in May and ending in August. During the service, we will treat the vegetation around the perimeter of your yard, the landscape around your property as well as beneath decks. Our treatments also consist of using a larvacidal where needed and a thorough inspection of your property.
- Step 3:** In the event that mosquitoes are biting between treatments, simply contact us and we will make an additional treatment within one business day. The three-week interval will also be adjusted from this treatment date. Please also note that any additional treatments do not affect your seasonal fee.
- Step 4:** Enjoy a bite-free yard all summer without getting eaten alive by mosquitoes!

## Having a family reunion? Picnic? Graduation party? Or an outdoor wedding at you home this summer?

Our Mosquito Event Treatment is a one-time mosquito control solution. This is a short-term treatment that is delivered in time for your event so your guests can enjoy themselves.

**Call us at 1-800-949-2667 for details and pricing.**

\*Our aim is to provide a bite free environment in your yard. What we cannot prevent is an occasional mosquito entering the yard and biting you.

## WHY CHOOSE COOPER FOR YOUR BITE-FREE YARD?

- The science and research behind our program allows us to offer a guaranteed bite-free yard while other most other companies do not offer this guarantee.
- Other companies may require you to eliminate mosquito sources and standing water on your property to qualify for their guarantee. Ours has no strings attached.
- If bites are occurring in your yard, just let us know and a service will be rendered within one business day of notifying Cooper (provided wind speeds are less than 10 mph, and it is not raining).
- Our effective treatment is environmentally conscious.
- We will monitor the service throughout the season and make adjustments with treatment techniques in real time, not at the end of the season.

Bugs are **Smart**, We're **Smarter**

# ELIMINATE & PREVENT TICKS

Lyme disease and other tick-borne illnesses have been on the rise. The key to protecting you and your family from Deer Ticks and American Dog Ticks is professional tick control from Cooper Pest Solutions.

## Follow these steps to eliminate and prevent ticks:

- Step 1:** Tick signs usually are the ticks themselves and secondary signs can include medical symptoms from diseases or fluids transmitted by ticks.
- Step 2:** Call Cooper Pest Solutions and a representative can give you a **FREE** no-obligation quote for our Tick Control Service.
- Step 3:** One of Cooper's skilled technicians will assess your needs based on your property and the surrounding environment and target treatment in the areas where ticks are already present. This treatment will ideally begin in April but can be effective as long as it begins before the fall.
- Step 4:** Enjoy your yard by reducing the likelihood of tick entry.

# WHY CHOOSE COOPER'S TICK SERVICE?

- Our knowledge of tick biology allows us to create cutting-edge treatments to successfully eliminate and prevent ticks on your property.
- It is not necessary to treat your entire lawn for ticks! While many companies focus on trying to treat ticks by providing large-scale turf applications, Cooper knows that ticks live and breed in the un-manicured areas around your home, and this is how we treat. Cooper's methodology is much more effective and uses much less pesticide.
- Our method is to treat the un-manicured areas around your home — mulch, groundcover, leaf litter, and any other overgrown area. We will also treat the perimeter of your yard and 5 feet into the turf which will prevent Ticks from migrating into your yard.
- Our effective treatment is environmentally conscious.
