

## FEATURES

My Day

**Start visits off on the right foot with a shared plan that everyone can see and contribute to.** See plans for the day, share a moment, or look back on yesterday's memories.

My Life

**Shift the conversation with unique content provided by the care recipient or their family members.** Use personalized albums with photos, text, and audio to support meaningful conversation, reminiscence therapy, or respectful redirection of responsive behaviors.

My Health

**Up to 80% of information shared during a medical visit is immediately forgotten by patients.** Keep track of it all with appointment notes, care provider contact information, a medication list, and health history in one central place that's shared only with those who need it.

Chat

**Good communication within the care team is central to quality care.** Quick and secure, in-the-moment chat gives the whole care team an easy way to stay in touch. Sometimes peace of mind is only a chat message away.

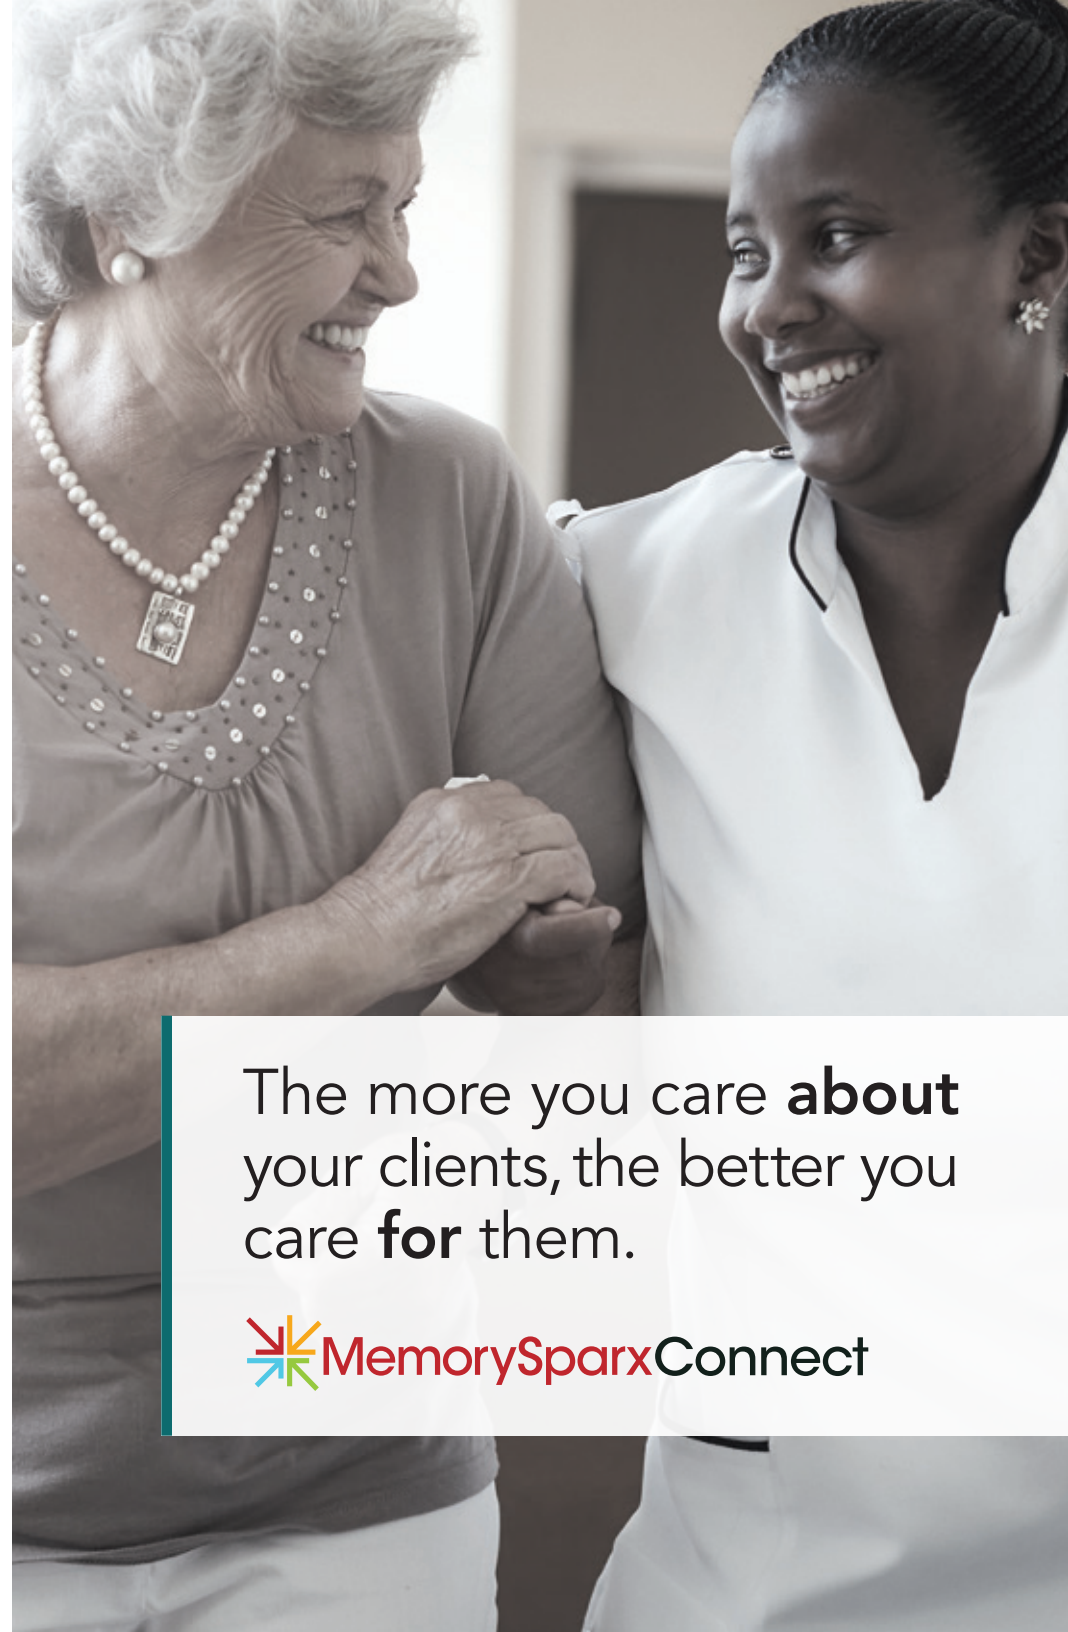

Care Circles

**Every care recipient has a unique support network.** Invite their most trusted care providers, family members, or friends to participate in the care circle by sharing photos and other useful updates. Control which team members can view health information.

## BENEFITS

### BUILD a connection

Spark authentic conversations using photos, text, and audio that reflect the life story of each care recipient.

### COMMUNICATE with ease

Keep the right people informed at the right time with quick in-the-moment chat, care journal entries, and shared daily agendas.

### EMPOWER staff

Give staff members the tool they need to do a great job anywhere, from any connected device. Happy staff, happy clients.

### FOSTER inclusivity

Invite care recipients and their care partners, including family members, to participate in the circle of care. Show health information only to those who need it.

### ENHANCE collaboration

Get timely and useful insights from family members and support seamless staff transitions with a shared information record that's updated in real-time.

### MANAGE cost with integrity

Increase staff productivity without sacrificing quality care. Meet growing demand for connected care with a secure and scalable solution that's tested for ease of use.

## EASY TO USE

- 1 **Create** a care circle for the care recipient.
- 2 **Invite** the care recipient and their care partners, including family members, to participate in the circle.
- 3 **Begin** collaborating with the team! Access can be customized for each team member.
