

# Digital Conference Room

## All-in-one Team Collaboration Device

The Spark Board, like no other, is a new team collaboration device that combines wireless presentation, digital white boarding, audio, and video conferencing. It enables team collaboration in physical meeting rooms, but also securely connects to virtual meeting spaces. The Spark Board resides in physical meeting rooms but is connected to the Spark service to facilitate continuous work-flow before the meeting starts and even after everyone has left the physical room. Through the Spark app, team members both in the physical conference room and attending remotely can meet, message, call, and, now, white board from anywhere through their device of choice.
