VPN and Mobility

Supporting the Mobile Workforce, Enabling Employee Productivity

The modern enterprise is evolving. The network now has to accommodate more mobile users, more contractors, and more endpoints. It is critical to know what users and endpoints are doing on your network. When it comes to security, visibility is paramount. Empower your employees to work from anywhere, on company laptops or personal mobile devices, at any time.

Mobility Management

Unify management and control of thousands of mobile and desktop devices in the secure, browser-based dashboard.

- **Provision**: *Pre-enroll devices or dynamically add users as they join your network*
- **Monitor**: *Locate and track laptops and mobile devices anywhere in the world*
- **Secure**: *Protect devices and their data with encryption enforcement, enterprise remote wipe, and integrated network access control*

Client VPN

More and more, employees wish to work on corporate laptops as well as personal mobile devices from anywhere.

- **Empower**: *Enable secure remote access for your employees*
- **Secure**: *VPN delivers visibility and the control to who is accessing the extended enterprise*
- **Enforce**: *Comprehensive endpoint security platform*

Benefits

Greater Visibility
Gain more insight into user and endpoint behavior with full visibility across the extended enterprise.

Access from Anywhere
Give any user highly secure access to the enterprise network, from any device, at any time, in any location.

Secure
Defend against threats, no matter where they are. Prevent noncompliant devices from accessing the network.

Simplified Management
Provide a consistent user experience across devices, on and off premises, and simplify management with a single agent

Streamline Compliance
Customize policies for each user group in your organization.

Automated Device Provisioning
Devices are provisioned based on group enrollment, security compliance, and geofence location.

Expert Experience

LookingPoint provides enterprise grade networking solutions supporting the mobile workforce to help enable employee productivity. It doesn't matter if you are looking for cloud managed, onsite, or co-location networking services; LookingPoint provides it all. When partnering with our customers, LookingPoint uses its expertise to design, build and manage network infrastructure.
