

WHISHWORKS™

API Recipes with MuleSoft® Anypoint Platform™

Contents

Preface	ix
Introduction	x
Acknowledgements	xi
RECIPE 1 Setting up CloudHub environment	01
Pre-requisites	01
Process	01
High Level Steps	01
Anticipated Issues	11
References	11
RECIPE 2 RAML Editor for API Implementation	12
Pre requisites	12
Process	12
High Level Steps	12
Anticipated Issue	17
References	17
RECIPE 3 Designing your API with Swagger in Anypoint API Designer	18
Pre requisites	18
Process	18
High Level Steps	18
Improvisations	26
References	26
RECIPE 4 Implementing a Simple API and Deploying to CloudHub	27
Pre-requisites	27
Process	27
High Level Steps	27
Anticipated Issues	40
Improvisations	41
References	41

RECIPE 5 Deploy a Proxy on CloudHub	42
Pre-requisites	43
Process	43
High Level Steps	43
References	51
RECIPE 6 Implementation of a new API through API-led Connectivity	52
Pre-requisites	53
Process	53
High Level Steps	53
Anticipated Issues	83
Improvisations	83
References	83
RECIPE 7 API Auto-Discovery	84
Pre requisites	84
Process	84
High Level Steps	84
Anticipated Issues	95
References	95
RECIPE 8 Managing API through API console	96
Pre-requisites	96
Process	96
High level Steps	96
Anticipated Issues	101
References	101
RECIPE 9 Sharing APIs with Developers and Partners	102
Pre requisites	103
Process	103
High Level Steps	103
Anticipated Issues	109
References	109
RECIPE 10 Adding JSON Schema as Reference in RAML	110
Pre requisites	111
Process	111
High Level Steps	111
Anticipated Issues	118
References	118
RECIPE 11 Importing RAML into another RAML Definition	119
Pre-requisites	120
Process	120

High Level Steps	120
References	125
RECIPE 12 Set up email alerts in applications in CloudHub	126
Pre requisites	127
Process	127
High Level Steps	127
Anticipated Issues	133
Improvisations	133
References	137
RECIPE 13 Implementing Cross Origin Resource Sharing (CORS) on an API	138
Pre requisites	139
Process	139
High Level Steps	139
Anticipated Issues	146
References	146
RECIPE 14 API Traffic Management Using SLA and Throttling Policies	147
Pre-requisites	148
Process	148
High Level Steps	148
Anticipated Issues	169
References	169
RECIPE 15 Securing an API with OAuth2	170
Pre requisites	171
Process	172
High Level Steps	172
Anticipated Issues	182
References	182
RECIPE 16 Exposing legacy SOAP-based Web Service as RESTful API	183
Pre-requisites	184
Process	184
High Level Steps	184
Anticipated Issues	196
References	196
RECIPE 17 JSON & XML Threat Protection of APIs	197
Pre-requisites	197
Process	197
High Level Steps	197
References	207

RECIPE 18 Insight – Tracking APIs	208
Pre requisites	209
Process	209
High Level Steps	209
Anticipated Issues	214
References	214
RECIPE 19 Enabling Custom Business Events to Track Incoming Requests on the API	215
Pre-requisites	215
Process	216
High Level Steps	216
Anticipated Issues	235
References	235
RECIPE 20 Manage Anypoint MQ with its APIs	236
Pre-requisites	236
Process	236
High Level Steps	236
Anticipated Issues	253
References	253
RECIPE 21 Handle Salesforce Streaming Content with an API	254
Pre requisites	254
Process	255
High Level Steps	255
Anticipated Issues	265
References	265
RECIPE 22 Implementing Asynchronous RESTful API	266
Pre-requisites	266
Process	266
High Level Steps	266
Anticipated Issues	285
References	285
RECIPE 23 Implementing Custom OAuth Provider	286
Pre requisites	288
Process	288
High Level Steps	288
Anticipated Issues	298
References	298
RECIPE 24 Implementing Caching Strategy on a Mule Flow	299
Pre requisites	299
Process	300

High Level Steps	300
Anticipated Issues	318
References	318
RECIPE 25 File Upload with REST API	319
Pre-requisites	319
Process	319
High Level Steps	319
Anticipated Issues	330
References	330
RECIPE 26 Mule Message Encryption and Decryption	331
Pre-requisites	331
Process	331
High Level Steps	331
Anticipated Issues	345
References	345
RECIPE 27 Implementing Routing Rule on API Proxy	346
Pre requisites	347
Process	347
High Level Steps	347
Anticipated Issue	366
Alternates	366
References	366
RECIPE 28 Implementing Custom Policy on an API	367
Pre requisites	367
Process	367
High Level Steps	367
Anticipated Issues	378
References	379
RECIPE 29 Functional Testing of APIs using MUnit	380
Pre requisites	380
Process	380
High Level Steps	380
Anticipated Issues	389
References	389
RECIPE 30 Functional Testing of APIs using SOAP UI	390
Pre requisites	390
Process	390
High Level Steps	390
Anticipated Issues	406
References	406

RECIPE 31 Performance Testing of APIs	407
Pre requisites	407
Process	407
High Level Steps	407
Anticipated Issues	425
References	425
Appendices	426
