

SuitePad TV Control

The Modern Hotel TV Remote

BETTER USER EXPERIENCE

SuitePad TV Control provides your guests with a seamless watching experience. It's easy to use and the available channels are clearly presented with their logo for quick navigation. Guests also have the ability to filter according to category or language so they can find exactly what they want without the need to channel flick.

REPLACE OUTDATED REMOTES

Simplify your room inventory by replacing conventional remote controls with SuitePad TV Control. Our tablets are easier to clean for housekeeping and more hygienic for your guests. There's no need to change the batteries – the tablets recharge automatically on their docks.

INCREASED GUEST ENGAGEMENT

When the SuitePad tablet is equipped with TV Control, guests also spend over twice as much time (2.3x) using the digital guest directory. This means more customer interaction and increased engagement with your content and services.

COMPATIBLE

All of our tablets come with a built-in infrared blaster so SuitePad TV Control is compatible with almost all hotel room TVs. No additional hardware is required.
