

SuitePad Phone

Replacing the guest room telephone

INTERNAL CALLS

Let your guests make free calls to other rooms or reception. Whatever they need, connect them with the right contact person with just the click of a button.

EXTERNAL CALLS

Most guests use their smartphone to make calls, but SuitePad Phone can offer a back-up option, for example by enabling emergency calls. A restriction to toll-free calls is possible.

INTEGRATED SYSTEM (Optional)

SuitePad Phone can be seamlessly integrated with your existing telephone system. This allows you to carry on using your current payment plan, and make calls independently from your WiFi connection. You'll also future-proof your telephone system for the inevitable transition to pure SIP connections.

SERVICE AND SUPPORT, ALL FROM ONE PROVIDER

Avoid dealing with multiple providers and technologies. With SuitePad Phone, all your telephone needs are integrated in one package. There are no initial costs, and we offer 24-hour support through our service partner.

Choose your SuitePad Phone variation:

Integrated

with the existing telephone system

- A PBX/Gateway Server is installed on-site
- External calls via the landline, with only the administration cloud-based

ADVANTAGES

- ✓ Direct internal calls
- ✓ Keep using your current payment plan
- ✓ Independent from WiFi connection

Cloud

No additional hardware needed

- Calls to hotel staff via the public telephone network
- Simple payment plans

ADVANTAGES

- ✓ More cost-efficient
- ✓ No hardware installation
- ✓ No on-site maintenance
