

Export Complete Product List to Excel

You can export a list of products into an Excel spreadsheet with these steps:

1. On the Admin Main Menu, click **MSDS Search**.

2. Without entering any search criteria, click **Search**. This will display a list of every chemical in your system on multiple pages.

- a. Your results can be narrowed down by using [Column Designer](#) or editing your search fields.

3. Click **Export to Excel** to have the data sent to Excel.

This **Export to Excel** button can be found in many other locations. Look for it throughout the SafeTec system.
