

ASHI Use and Administration of Epinephrine Auto-Injectors

American Safety & Health Institute's *Use and Administration of Epinephrine Auto-Injectors* teaches students about causes of severe allergic reactions, how to recognize and treat anaphylaxis, the use of auto-injectors, legal considerations for administering epinephrine and how to prepare for an anaphylactic emergency.*

*Regulations on the administration of epinephrine vary greatly from state to state, and can vary depending on the industry or market segment. Check the HSI regulatory tool in OTIS for the approved uses of this program in your area.

AMERICAN SAFETY & HEALTH INSTITUTE

Intended audience

Childcare providers, school system employees and camp counselors and administrators. This program is also appropriate for training the general public (Good Samaritans).

ASHI-approved training materials

Instructor materials

- *Use and Administration of Epinephrine Auto-Injectors* Program Package
- Includes Instructor Guide, DVD, Sample Student Book and access to digital tools including program PowerPoint®

Digital Resources
