

Mobility is a key business enabler, but using the mobile and desk phone together for collaboration has always been a disjointed experience. Until now.

Liberate unifies desk phones and mobiles in a single solution to simplify and enhance communications between teams and customers. Since call integration happens in the network, there's an effortless handover between mobile and landline calls. The mobile phone also has versatile UC functions, so you can enjoy the best of your desk phone on the mobile for an office-like experience on the go.

### Liberate your workforce

Receive and forward calls from both mobile or desk phone so they go to the right person. And move calls from the desk phone to your mobile and back again to suit your movements. When you make a call, you can choose either your mobile number or desk phone number to suit your situation.

One number and simultaneous ring on multiple devices help you answer calls on the nearest phone. At the same time, a single voicemail helps you never miss customer messages, with no need to go back to the office to access voicemails.

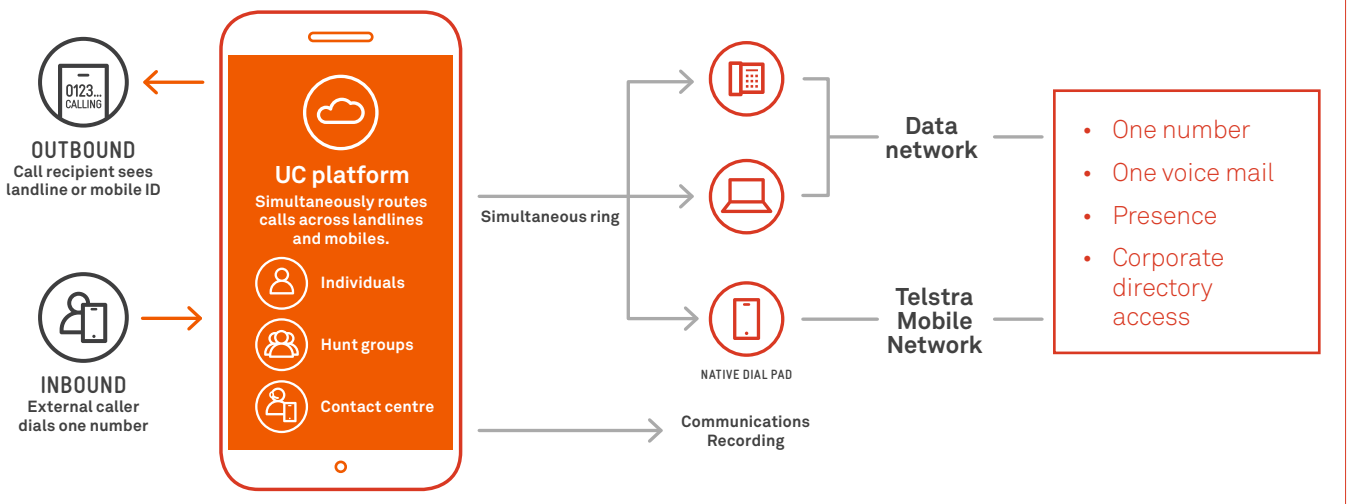

### The power of a desk phone on your mobile

Take advantage of UC functions on the mobile including video calls, Instant Messaging, Presence, conferencing, and contact details from the directory. And continue to use existing mobile phone features like SMS, MMS and roaming. You can have all of these functions available in hunt groups to tap into a dispersed talent base, or support hot desking and staff productivity on the road or at home.

No matter how big or small your business, Liberate frees your people from their desks. It empowers them to act in the moment and do more in their working day.

### How does it work?

Call integration occurs in the network so desk phones and mobiles work together as one.

Liberate integrates our VoLTE mobile technology with our unified communications network service to deliver UC functions and voice to the mobile phone. Intelligence within the Telstra network connects the SIM on your mobile as though it was an extension of your PBX or UC service. This deep integration allows your mobile to function like your desk phone. Mobile calls have prioritised routing on the 4G voice channel. This enables better call quality than with Over The Top (OTT) apps using data channels.

## Features

Features	Benefits
<b>Inbound Number/ Name Display</b> <ul style="list-style-type: none"> <li>See internal caller identity from your active directory, and external caller identity from your contact directory.</li> </ul>	<ul style="list-style-type: none"> <li>Identify important calls so you can prioritise them. Great for hunt groups.</li> </ul>

## Things you need to know

To take advantage of Liberate Office (TIPT), you must have:

- a) A **Telstra mobile service** with unlimited standard national calls included; and
- b) An existing **TIPT service** with Standard or Executive pack; and
- c) **TIPT Complete add-on** (provided at no additional cost for Liberate users).

To take advantage of Liberate (SIP Connect), you must have:

- a) A **Telstra mobile service** with unlimited standard national calls included; and
- b) An existing **SIP Connect Business Line** or **Business Trunk pack with SIP Complete** calling plan (unlimited standard national calls).

The free, downloadable Liberate app offers deeper functionality for configuration and call control with Liberate. It is designed for mobile phones only, not soft phones or tablets.

Note: International calls from a mobile with Liberate will be charged based on the fixed service (i.e. TIPT or SIP Connect) calling rates. International call inclusions of the underlying mobile plan will not be accessible, and the mobile service will not be eligible to take up international calling add-ons.

## About Telstra

We provide network services and solutions to more than 200 of the world's top 500 companies. They rely on us to do business across 240 countries and territories and to enable greater productivity, efficiency and growth.

Our solutions offer the best of all worlds – skilled people and a rich portfolio of services delivered on our world-class Telstra Next IP® network and Telstra Mobile Network. To ensure reliable performance, they're monitored and maintained from our dedicated centres using advanced management and operational systems. And they're backed by Telstra Enterprise-grade Customer Service® and one of Australia's largest and most qualified field and technical workforce.
