ABOUT INDIA INTERIOR EXPO- 23

India interior expo is highly inspirational for architects, designers & Developers

The unique show offers valuable insight into the industry's current demands and trends and highlights various opportunities. India Interior Expo allows individuals and companies to network, partner and build professional relationships through exchanging ideas and knowledge.

As a Designer, Architect, Engineer or Developer in the Construction real estate industry, it is important to know about the current market trends to keep clients updated. There are also many stages set up where industry experts provide valuable insights through talks and discussions. The expo is also home to meeting lounges and specific areas designed for students to be inspired by some of the exhibitors that showcase their products at this show making this event a great place to exchange ideas and understand potential opportunities. The expo comprises of presentations and panel discussions, which are hosted by industry experts.

This festival is promising, especially for interior design students and professionals. The fest allows the city's artists and creators to showcase their creativity on this platform.

Urban

Intervention

JAIPUR PAST & FUTURE

Cities are manifestations of human behavior among individuals and groups intertwined with nature and environment. Human behavior is a turn a resultant of the way people think, perceive and understand realities. Indian cities are a result of web of interrelate networks of diverse cultural, urban planning, environment, technology, human perceptions , design and architecture. The unique theme of this show is chosen with respect to address the future needs of our city.

The exhibition aims to enhance the capabilities of brands working on urban projects. Enabling manufactures , distributors, dealers to give innovative and creative design solutions to ever growing city. Artists, Architects, Designers, Engineers and Developers find a platform to enhance their network with brands bringing about economic and social changes to the construction scene of this heritage city. Urban interventions deals with the design and management of spaces of ecological, social and cultural significance.
