

Chart **IQ**  
**CryptoIQ**

Powerful Tools For  
Modern Currencies

**CryptoIQ is a customizable trading and analysis toolkit built specifically for cryptocurrency exchanges.**

## The Industry's Best UI For Crypto Charting

A complete suite of advanced charting tools to visualize your back end efforts, beautifully.

An off-the-shelf white labeled solution that's easy to assemble.

A simple and effective way to differentiate yourself in the noisy crypto marketplace.

Total control over what touches and connects to your front end. Security, hardware, and data are yours to choose and manage.

Seamless delivery on all platforms and devices.

*"The entire team at Coinone considers ChartIQ as one of the most reliable solutions for crypto charting. ChartIQ's Charting Library supports various plugins, advanced charting and technical indicators that users love, and provides fast support feedback."*

**Tony Park, Product Manager - Coinone**

# Crypto, Assembled

Powered by ChartIQ's Charting Library, CryptoIQ offers high performance charting, advanced technical analysis, and a crypto-specific toolkit. Deliver a top of the line experience to users around the world.

CryptoIQ bundles all of the UI components a firm needs to serve new and experienced traders alike, and is delivered consistently on any platform—web, mobile, and desktop. We'll never ask you to use third-party infrastructure or a third-party server. You have total control over the UI and everything the UI touches.

## Built for Crypto

- Accelerate time-to-market with our easy to assemble toolkit
- Deliver the most sophisticated UI in crypto and differentiate your platform
- Provide professional charts with over 150 indicators and many technical features, including a depth of market study and market depth historical chart
- For additional power, leverage ScriptIQ: a plugin that allows advanced traders to build their own custom indicators
- Get industry specific with our order book with volume profiles
- See a detailed record of trades and transactions with our trade blotter
- Our Trade from the Chart add-on and click-to-trade functionality works seamlessly across devices, so traders that place orders at their desk can conduct them from their mobile devices, as well as from their order book or trade blotter

## Performance

- Native-like application performance and seamless delivery on all platforms and devices
- Built from the ground-up in HTML5
- Easily add interactive time series charts to your application or web page
- Leverage the best charts and data visualizations in the crypto and capital markets industry

## Flexibility

- CryptoIQ is a single solution that simplifies the management of crypto applications—regardless of language or framework—across web, mobile, and desktop
- Integration is easy with our purpose-built SDK, injection API, extensive documentation, and U.S.-based customer support
- No need to overhaul your entire technology stack
