

MOBILE & WEB DEVELOPMENT

Cloudbakers focuses on 3 types of cloud migrations: on-prem, cloud to cloud, and concept to cloud. Regardless of where your application currently exists (even if it's only an idea) we can move it, build it, and customize it to your specific needs.

Top Drivers for Developing Custom Apps

- Create scalable & secure **streamlined processes**, cost-effectively
- Improve **user experiences** for customers and employees
- **Test new business models** with quick to launch Proofs of Concept

Innovate development for success:

Let's look at some use cases:

HIGH GROWTH STRATEGY

NEED

SOLUTION

Infer customer satisfaction without using surveys

Built **dashboard** pulling from multiple APIs & displayed information through **digital signage** to obtain a pulse of member & employee conversations

Locate specific information from boxes of paper documents

Digitized documents and created properties to allow for quick **querying** on over 15M docs stored on **Google Drive**

Easily scale by geography through acquisition

Developed video call center using **Google App Engine** & deployed using **Chromebase & Chrome kiosk apps** to expand geographic reach
