

## AWS TOP CLOUD PROVIDER

Amazon Web Services (AWS) remains the leader in the Infrastructure-as-a-Service (IaaS) world, according to Gartner Inc.

## CUSTOMER COMMENTS

Comments from Laserfiche Docs-on-the-Cloud users are extremely favorable.

*"Snapshot, OCRing documents, creating folders and copying documents all worked flawlessly."*

*"There was no slow down with scanning, storing or importing documents – ran just as fast on my virtual machine productivity."*

## Docs on the Cloud

### PUT LASERFICHE ON THE CLOUD

**GFC Docs-on-the-Cloud** hosting provides all of the architecture, backups and access for your Laserfiche environment, while leaving you in complete control and reducing the total cost of server management. All Laserfiche software connects directly to the server with full SSL security, including Web Access and Mobile.

GFCConsulting Group has developed optimized Laserfiche Server Instances featuring Windows Server 2012, data transfer and backup between regional data centers, Elastic IPs, server monitoring and reporting. The Instances are provided in the AWS region closest to the customer at facilities around the world.

Gartner says 70 percent of all IT customers are planning to implement cloud solutions. GFCConsulting Group has developed the convenience of a cloud-based hosted service, while maintaining Laserfiche's powerful functions, security and licensing options.

- No internal server hardware, server software or backups to administer
- No up-front hardware server costs - simply a monthly fee for the service period
- No change to your Laserfiche licensing or VAR agreements
- Delivered by your trusted Laserfiche VAR
- Includes backup
- Includes secure data transfer
- Maintains full Laserfiche administration and configuration rights
- Can have separate instances for Laserfiche and SQL Server
- Transferrable, can always be moved back to an on-premise server, if desired
