Laserfiche is the solution to your Enterprise Content Management requirements. Now, Laserfiche Rio on the Cloud gives you Laserfiche power, fully configured, as a monthly Software-as-a-Service subscription. Access documents from PC, tablet or phone anywhere, anytime from a secure, dedicated Cloud server.

With Laserfiche Rio on the Cloud, you can be up and running in days. There are no servers, no up-front capital costs, and no maintenance or administration costs. You enjoy the benefits of a full Laserfiche system, including the professional support of Laserfiche and its Partners, hosted in a proven, secure Cloud environment.

Laserfiche Rio Highlights

Powered by Laserfiche and Amazon Web Services, with millions of users. Servers are available around the world.

Secure Cloud architecture satisfies all current DoD, HIPPA and financial service industry security specifications.

Turnkey implementation allows licenses, secure server access, repository and folder creation within 72 hours.

Access your documents and records from any location in a secure hosted environment. Use either the Laserfiche desktop client or Web Access. Connect from your PC, tablet or phone.

No server administration costs since backups, maintenance and upgrades are handled automatically.

No capital outlay for servers, software licenses or maintenance contracts. Pay for only the licenses that you use monthly.

Includes Laserfiche Workflow to automate notifications, approvals, folder creation and other tedious tasks that slow you down.

Supports all files types. Add files by scanning, or drag and drop into your repository. Integrates directly with Microsoft Office, Outlook and many other applications.

Rio on the Cloud

A Model Solution

Why haven't you adopted ECM already? Studies indicate it returns one of the highest ROI that any company can achieve. Chances are that the reason is included in the list below. Laserfiche Rio on the Cloud is the answer to any and all of these impediments:

Organizational	Technical	Budgetary
• Limited or unavailable IT support	• No on-premise server capacity available	• Limited or no capital for servers
• Unique departmental requirements	• Server maintenance staff time unavailable	• No available backup capacity or limited service
• Organization too small for normal Rio licensing	• Server operating systems or licenses not up to date	• Departmental budget available, but IT no budget
• Multi-member organization or association	• Software assurance and upgrades required	• Scaled implementation allowing expansion as necessary
• Geographically dispersed	• Best of breed architecture required	• Pay as you go operating expense budget requirements
• Remote & mobile access necessary		

ECM for Our Time

Laserfiche Rio on the Cloud provides unparalleled Laserfiche Enterprise Content Management functionality, with the flexibility, scalability and innovation only available in a Software-as-a-Service implementation.

Rio on the Cloud is Scalable

1 to 100,000. No matter how many users, Rio on the Cloud will support them with an infinitely scalable architecture. Rollout at your own pace. Add users under your own schedule and pay for only the licenses that you need when you need them.

Rio on the Cloud is Vertical

Laserfiche has proven implementations in virtually all public- and private-sector vertical markets, including:

- Government
- K-12 & Higher Education
- Justice Systems
- Financial Services
- Real Estate
- Transportation
- Insurance
- Wholesale & Retail
- Franchising
- Manufacturing & Mining
- Technology
- Business Services
- R & D
- Health Care
- Commercial

Rio on the Cloud is Easy

For a standard monthly subscription, a user receives a Laserfiche Rio named-user license, access to a secure Laserfiche repository running on a proven Cloud server architecture, 20 GB of document storage, SSL encryption, server maintenance and backup, and access to over 200 training videos.

Laserfiche Rio on the Cloud is provided by Cambridge Connections an Amazon WebServices Solution Provider.
