CORE Eligibility Letter #: 20-012

Mr. Jeffrey C. Flath
President and Chief Executive Officer
eNow, Inc.
133 Hallene Road
Warwick, Rhode Island 02886

Dear Mr. Flath:

Thank you for your interest in the Clean Off-Road Equipment Voucher Incentive Project (CORE). Your CORE Equipment Eligibility Application and associated documentation have been reviewed by California Air Resources Board (CARB) staff. Based on the programmatic requirements set forth in the CORE Implementation Manual (released on December 16, 2019), staff has determined that the eNow Transportation Refrigeration Units identified in the attached *CORE Eligibility Table* are eligible to be purchased using CORE. For as long as eligibility is effective, a voucher may be requested (and issued, if warranted) for the models and configurations covered by this letter.

Only equipment identical in all material respects to the configurations listed in the attached table (as described in your CORE Equipment Eligibility Application) is eligible. Unless eligibility is revoked by CARB or the manufacturer submits an updated CORE Equipment Eligibility Application for the applicable equipment, eligibility will remain effective for one calendar year from the date of this letter.

Please note that this letter only serves to notify you of your equipment eligibility in CORE; it does not constitute a CARB endorsement, verification, or certification on unit performance, durability, or reliability.

CORE is part of California Climate Investments, a statewide initiative that puts billions of cap-and-trade dollars to work reducing greenhouse gas emissions, strengthening the economy and improving public health and the environment – particularly in disadvantaged communities. The cap-and-trade program also creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution.

Mr. Jeffery Flath

Attachment to CORE Eligibility Letter #20-012 (Dated April 7, 2020)

CORE Eligibility Table

Equipment Category: Transportation Refrigeration Unit Equipment

Manufacturer: eNow

| Configuration # | Equipment Model | Configuration |
|-----------------|---|--|
| 1 | Single Temp Zero-Emission Trailer Refrigeration System - K55520 | New; 48' Trailer; 20 kWh Advertised and Rated Capacity |
| 2 | Single Temp Zero-Emission Trailer Refrigeration System - K55520 | New; 53' Trailer; 20 kWh Advertised and Rated Capacity |
| 3 | Single Temp Zero-Emission Trailer Refrigeration System - K55540 | New; 48' Trailer; 40 kWh Advertised and Rated Capacity |
| 4 | Single Temp Zero-Emission Trailer Refrigeration System - K55540 | New; 53' Trailer; 40 kWh Advertised and Rated Capacity |
| 5 | Single Temp Zero-Emission Trailer Refrigeration System - K55560 | New; 48' Trailer; 60 kWh Advertised and Rated Capacity |
| 6 | Single Temp Zero-Emission Trailer Refrigeration System - K55560 | New; 53' Trailer; 60 kWh Advertised and Rated Capacity |
| 7 | Single Temp Zero-Emission Trailer Refrigeration System - K55580 | New; 48' Trailer; 80 kWh Advertised and Rated Capacity |
| 8 | Single Temp Zero-Emission Trailer Refrigeration System - K55580 | New; 53' Trailer; 80 kWh Advertised and Rated Capacity |
