

DDC INTELLIGENCE

The Intelligent Freight Billing Solution

With over a decade of experience as the #1 back-office partner for customized freight solutions processing over 30% of all LTL bills in the United States, we understand the pain points your company and our company experiences manually processing freight Bills of Lading (BOLs). That is why we have developed DDC Intelligence.

What is DDC Intelligence?

DDC Intelligence is a fully **customizable solution** that is designed to streamline and automate your manual billing process with capture rates, through-put rates, and accuracy rates you can be proud of.

DDC Intelligence is a combination of automated and semi-automated processes, as well as manual processes designed to be smarter and more, well, intelligent! This fully customizable solution has the capability to read, and capture, any BOL document. And, just like people, the solution becomes smarter and more accurate with time.

Why do you need DDC Intelligence?

Due to an increasingly complex billing arena and limitations with traditional manual freight bill entry processing, there has been significant pressure placed on improving performance.

The current manual BOL data entry process impacts your business with:

- **Slower Turn-Around Times**
- **Inefficient Or Redundant Processes**
- **Lower Accuracy Rates Due To Human Error & Turnover**
- **Higher Employment & Production Costs**

Manual data entry is burdensome.

Your company needs an accurate, efficient, cost-savings solution to capture your BOL data.

DDC Intelligence streamlines the back-office processes, primarily on manual bill entry. It is the leading and most accurate way to capture content on the front-end, that can extract data from all types of unstructured documents, reduce manual data entry and eliminate volumes of errors and manual re-work.

DDC Intelligence Offers:

- Improved Accuracy Of The Bill Entry Process
- Quicker BOL Data Entry
- Efficient Preparation for Clean, Collectible Invoices
- Standardization That Allows For Quality Metrics To Be Met
- Immediate Cost Containment and Long-term Savings
- Customized Adaptability To Integrate Seamlessly Into Your Billing Process Workflows

Key Benefits:

- Customizable Field Capture Of Any BOL
- Ability To Default Third-Party Based On Shipper ID & Terms
- Customizable Field Edits/Format/Instructions Specific To Customers
- In-Cab Or Terminal Short Bill Process
- Captures Skeleton Data
- Provides Short Cut Keys To Reduce Lag Time & Improve Data Entry Speed
- Customizable Performance Enhancements That Can Be Built To Your Needs

Partnering Together for Your Success

Because DDC Intelligence is a fully **customizable solution**; we'll want to spend some time together to understand your specific system and design requirements, as well as collect user input to ensure it seamlessly integrates into your workflows.

*The time to make a change is now.
