# IT OUTSOURCING

## ABOUT THE DDC GROUP

In today's ever changing business process outsourcing landscape, The DDC Group offer a unique hybrid of onshore, nearshore and offshore services.

Our professional onshore management teams ensure that our clients' front and back office business processing needs are successfully met and exceed performance expectations.

## WHAT IS IT?

Let us assemble a dream team of designers, software engineers, and QA specialists just for you. Extend your own IT team, but in a distributed development environment. Your exclusive team will increase output while reducing costs.

IT Outsourcing is the practice of seeking resources outside of an organizational structure for all, or part of an IT (Information Technology) function. Fun Factoid: Most large organizations outsource a portion of their IT functions.

## WHEN DO YOU NEED THIS?

### **You can't find developers**

You run into trouble hiring and securing the perfect cost-effective IT team of software developers and coders in your location.

### **Don't want to change a focus**

You need to develop a new software product, but you don't want to change the focus of your team.

### **You have a time limit**

You need to hire a team of IT professionals as soon as possible to reach all development goals.

### **You have a low budget**

You want to develop and bring new features to your software within budget.

## WHAT YOU GET

**Cost Reduction**  
Of Up To 60%

**Transparent**  
Pricing

**Flexible Access**  
To Resources

**No Recruitment**  
No Stress

**Easy Project**  
Start Time
