## What Our Clients Think:

*"As part of my company's core business we hire physicians to train other physicians in non-clinical settings. Recruiting physicians to do this type of non-clinical work, to say the least is difficult. I was introduced to MASC Medical about 2 years ago and since then they are the only physician firm I work with when it comes to physician recruitment for my company. It is a pleasure to work with MASC Medical, they never give up trying to find the right candidate for our roles. I am pleased to say that we have hired 2 physicians that were recruited by MASC and both have performed extremely well. Anytime I have to recruit for physicians for these roles, I will always use MASC as my preference for recruitment support."*

**Marty B., Director of Human Resources**

*"They're the best vendors I've ever worked with."*

**Michael B., Co-Owner**

*"They care about each relationship they engage with throughout the process. Each professional I spoke to had something good to say about my account executive."*

**Susan R., Director of Human Resources**

*"To say I've been impressed with MASC would be an understatement. MASC Medical has been there when we needed them - not once, not twice, but three times they've been able to find a doctor for us in less than 24 hours. How they've done it - I have no idea, but on 3 occasions (in different states) we were in a jam with no doctor and almost no notice. Each time, I've contacted them, I explained we were in need and they delivered solid replacement physicians to cover the work. Now, I do not recommend that short of notice, but they have produced when many other firms could not. The team at MASC Medical is easy to work with, super quick to respond, efficient, and fair."*

**Michael S., Managing Partner**

*"Working with MASC Medical was truly a pleasure. The team consists of true professionals. As different markets require different personalities, they are able to always choose the right fit. They are very attentive and work with you to ensure both the facility and joining medical professional communicate and understand each other for a perfect fit."*

**Michael R., Hiring Director**
