

BIG BLUE

Hi-Temp EP2 Lithium Complex Grease

Fleetline Big Blue Hi-Temp EP2 Lithium Complex Grease is a superior performance, lithium complex product that meets the highest standards for heavy-duty grease requirements. This premium quality, extreme-pressure grease is truly all-purpose.

Fleetline Big Blue Hi-Temp EP2 Lithium Complex Grease provides:

- Very high operating temperature
- Excellent resistance to water and water washout
- Superior pumpability at hot and cold temperatures
- Severe service wheel bearing application approvals for both disc and drum brakes
- Outstanding protection in shock load and extreme pressure service

Fleetline Big Blue Hi-Temp EP2 Lithium Complex Grease is rated NLGI Grade 2 with extreme pressure agents, plus rust and oxidation inhibitors. This grease is formulated with lubricity, anti-wear, high temperature and extreme pressure additives.

Fleetline Big Blue Hi-Temp EP2 Lithium Complex Grease is recommended for mixed fleets and heavy-duty, off-road equipment. Ideal as a multi-purpose lubricant for fifth wheels, king pins, wheel bearings, ball joints, universal joints, axles, bushings and disc brakes.

Typical Analysis

Test Description	ASTM Method	Big Blue
NLGI Grade	-	2
Cone Penetration	D-217	265-295
Thickener Type	D-128	Lithium Complex
Base Oil Kinematic Viscosity , cSt @ 40°C	D-445	240
Base Oil Kinematic Viscosity , cSt @ 100°C	D-445	22.5
Viscosity Index	D-2270	120
Color	Visual	Blue
Appearance	Visual	Slight String
Timken #OK Load	D-2509	45
Copper Strip Corrosion	D-4048	1B
Four Ball EP Weld PT KGF	D-2596	315
Dropping Point	D-2265	580 °F
Water Washout @ 79° C %	D-1264	5

Revised 3/2016

Note: Typical Analysis data is representative of average values, minor variations which do not affect performance may occur.
