

LOW VOLTAGE

ABOUT US

Superior Electrical Service

White Lightning Electric provides superior electrical service in the Portland-Vancouver metro area.

LEARN MORE

Alarm & Safety Systems

Alarm and security systems can be a life-or-death issue. At White Lightning, we understand that the wiring and installation of these low voltage systems must be done with the highest level of performance. A low voltage alarm system requires less power consumption and is powered by a back-up battery if the main power transformer is turned off or if there is a power outage. So, whether or not you have electricity, your alarm and safety systems will work. White Lightning provides alarm monitoring, installation, and service of each low voltage alarm and security system we install.

Video Monitoring

Low voltage video monitoring can provide almost any residential or commercial property with the CCTV (closed circuit television) and video monitoring security you need. Because of the low voltage system, you do not have to worry if your main power goes out. Your video monitoring system will remain active.

Landscape

Low voltage landscape lighting offers the perfect amount of security and comfort. Businesses and home owners need outdoor lighting that is both functional and aesthetically pleasing without running out their energy bill. Let White Lightning will install the wiring and lighting for your outdoor landscape.

Smart Panels

In most homes today, electricity is essential to day-to-day functions. With smart panels installed by White Lightning, you can easily control the electrical usage of your home or business. Smart panels are Ethernet connected, low voltage systems that help to pinpoint inefficiencies in energy usage and keep track of your building's electrical system status.

Home Networking

Let White Lightning provide your home with a low voltage home networking solution. From small to large homes, stay connected with our wireless networking systems.

Our home networking system includes:

- Voice & data phone systems
- Telecommunications
- Wireless routing
- Low voltage cabling
- Paging and intercom systems

Dear Customer,

First of all, I want to thank you for showing interest in White Lightning Electric, Inc.

I originated this company in 1999; right here in our beloved city of Portland, OR.

I pride myself and my company on integrity and stunning customer service. It is our pleasure to execute each job with skill and efficiency for a price that is reasonable.

My relationships that I have built with clients have been the drive that has put forth in making successful relationships in all aspects of my business. We're a triple generation family of electricians; I had the joy of working simultaneously with my father in the beginning of the company, and now I have the pleasure having my son work alongside me. While I do have family working with me, I truly feel that each member of the White Lightning Electric team is a part of my family as well. My intention is to build a long-term relationship with each and every customer, employee, and merchant. I appreciate you checking us out and I look forward to working with you!

Many Thanks,

Todd Turpin

President

White Lightning Electric

Meet the Team

Since the beginning, White Lightning Electric, Inc. has not only provided the commercial industry with the typical construction services, but we also have the ability to design, manage and provide project documentation for large scale projects. Our experienced staff is the key to successful completing commercial projects on time and on budget, which is something everyone can appreciate.
