

VOHKUS EBUSINESS

# V-IP is our suite of eBusiness tools designed to simplify and automate IT procurement

## Why choose eBusiness with Vohkus

Vohkus have helped thousands of customers implement our free eProcurement platform saving them time and money by realising efficiencies in process and the technology used for enquiries and order management.

Not only does Vohkus offer our own developed V-IP eCommerce portal but we are vendor agnostic when it comes to more complex requirements. We work with all the partners and platforms you would expect to ensure we can deliver bespoke solutions configured for a tailored solution. It's through our network of technical experience and our track record of successfully hand holding customer projects that ensures we listen and deliver on spec and on time, time and time again.

## How does it work?

Vohkus offer a variety of catalogue, ordering and invoicing solutions to cater for ever changing customer requirements.

### V-IP eCommerce Portal

For customers that just want the simplicity of intuitive and efficient online purchasing, a VIP portal can be spun up in minutes with favourite most purchased brands, products and approved buyers all setup and ready to go. Your account manager can take you on a tour of your personalised website and then it's over to you. We will always circle back to check in and ensure you are getting the most out of V-IP and the tools available.

### Punchout/OCI

This allows customers to login to the Vohkus website via a secure link stored in your chosen marketplace or ERP rather than typing in your user credentials. Secure sourcing of approved products and conversion of these baskets delivered direct to your requisition process and internal workflows.

### Static Catalogue

Vohkus also allows for the creation of custom flat files in multiple formats (Excel, CSV, CXML etc) which can be hosted internally and so negating the need to visit an external website.

### eOrdering

Orders can then be sent to Vohkus using the same agreed format for automated processing and therefore reducing the risk of user error.

### eInvoicing

Vohkus can return your invoices in the same chosen format in which the orders are sent. This again reduces the risk of user error and helps to systemise repeatable actions to save time searching for offline information.

## ABOUT VOHKUS >>

Vohkus delivers IT enabled business solutions and services, and is a trusted technology partner for both private and public sector clients, many of whom operate across the globe.

Founded in 2001, we have quickly emerged into a leading UK Technology Company. We push the boundaries and our refreshingly agile and flexible approach has allowed us to develop a reputation for outstanding customer satisfaction, underpinned by cutting edge technology expertise and facilities.

**Our capability is end2end:**  
 Consult >>> Design >>> Supply  
 >>> Deploy >>> Manage >>>  
 Support

By concentrating on our clients' needs and challenges, we keep focused on the end result. We find better, more inventive answers to business issues by getting closer to our clients and sharing ideas and knowledge – finding innovative new ways to transform their businesses.

### The primary benefits of a Vohkus eBusiness partnership

1. Save time and money. By consolidating purchases through one user friendly interface you'll increase efficiencies and productivity while decreasing transactional and fulfilment costs.
2. Reduce errors and control spend. Our eBusiness platform features built in controls and measures to minimise errors and prevent overspend against agreed budgets.
3. Plan for the future. Vohkus' eBusiness tools are your sole resource for purchasing, reporting and invoicing.
4. Free Consultancy. We have a passion and talent for helping our customers use technology to improve, innovate, and succeed. Achieving the business benefits and increased performance they need requires a strategic focus on technology and service delivery that will truly put them ahead of their competition.

This is the foundation of our approach, which we call...

**TECHNOLOGY EDGE >< BUSINESS EDGE**<sup>®</sup>
