

THE SUZUKI CELERIO

Suzuki Celerio

The Celerio is Suzuki's replacement for the popular Alto. The Celerio, like the Picanto, also has four doors. Back seat space in the Celerio is much bigger than the other two cars on this list – possibly an illusion or just clever design! The boot also seems to be a little bigger and better than the VW and Kia but at the same time; the 50 kW you get from the 1.0 litre Celerio engine is a tad behind the other two. That doesn't mean it feels like it needs help, it drives perfectly fine, it just sometimes needs a small kick. The Celerio is a comfortable, smooth cruiser and given the low price, starting at below R120 000; you would struggle to find something to compete with it. **₹**

“The Celerio is a comfortable, smooth cruiser and given the low price you would struggle to find something to compete with it.”
