RONCELLI PLASTICS ACHIEVES ISO 27001 INFORMATION SECURITY REGISTRATION FROM NSF INTERNATIONAL STRATEGIC REGISTRATIONS (NSF-ISR)

Certification to ISO 27001 helps organizations meet information security requirements

MONRVOVIA, California, April 4 – Roncelli Plastics has received ISO 27001 Information Security registration from NSF-ISR, a division of global public health organization NSF International. The ISO 27001 standard describes the requirements for establishing, implementing, operating, monitoring, reviewing, maintaining and improving a documented information security management system.

A premier manufacturer of non-metallic components, Roncelli Plastics has partnered with the most prestigious and innovative corporations to support their plastic and non-metallic requirements. Roncelli Plastics invests in the latest manufacturing technologies to achieve the most stringent customer requirements, while maintaining world class levels of quality and cleanliness. Achieving ISO 27001 registration through NSF, an independent third-party organization, demonstrates Roncelli's commitment to security and information protection through the implementation of an information security management system.

"Obtaining ISO 27001 Certification has been a Strategic Initiative for our organization over the last two (2) years." said Chris Cole, President & COO of Roncelli Plastics "It is our goal to deliver Best-in-Class service to our clients and we believe that maintaining a solid security protocol for their data substantially furthers these efforts. While data security has always been a point of emphasis at Roncelli, the certification process has allowed us to create a cohesive system incorporating various client and regulatory requirements, including NIST 800-171."

"Organizations often manage sensitive or proprietary information as part of everyday business practices. In achieving the requirements of ISO 27001, Roncelli Plastics shows their ability to protect that information according to recognized best practices in information security. Certification allows Roncelli Plastics to implement policies that align with their business objectives and information security goals," said Don Sinkway, Business Development Manager at NSF.
