

# The new and improved *Hospital Pharmacist's Letter* website is here

We've redesigned our web experience with you in mind.

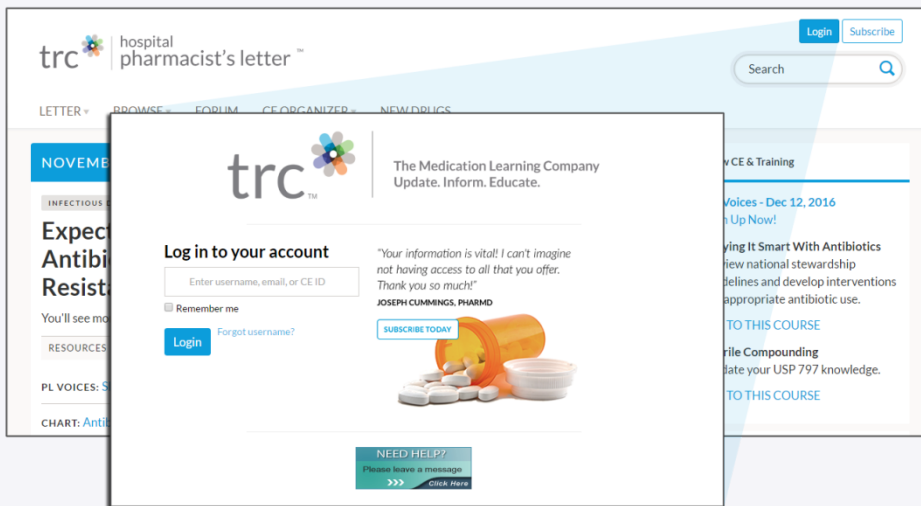

## Benefits at a glance

- **Modern design** to make your web experience even better
- **Now mobile optimized** for your phone or tablet
- Explore our latest recommendations with **easy navigation**
- Bigger fonts and more white space for **better readability**

# Visual guide to the significant changes

## How to login

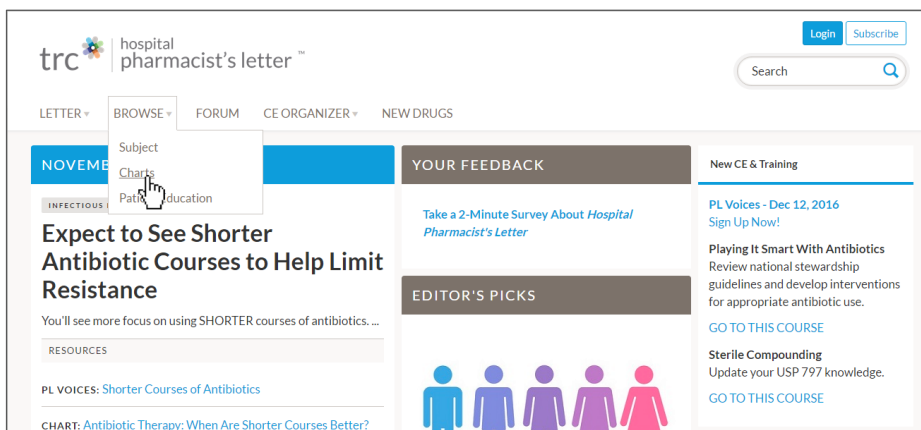

Go to the new site: [hospital-pharmacist.therapeuticresearch.com](http://hospital-pharmacist.therapeuticresearch.com)

Click the Login button in the top-right corner.

Enter your login credentials and click the Login button to get access!

## Navigation Menus

Site navigation is now handled by drop-down menus along the top of the site.

Mouse over the section you're interested in, and click an item for access.

# The Letter

The screenshot shows the homepage of the Hospital Pharmacist's Letter. The top navigation bar includes 'LETTER', 'BROWSE', 'FORUM', 'CE ORGANIZER', and 'NEW DRUGS'. A search bar is located in the top right. The main content area features a table of contents on the left and an article titled 'Expect to See Shorter Antibiotic Courses to Help Limit Resistance' under the 'INFECTIOUS DISEASES' category. The article text begins with 'You'll see more focus on using SHORTER courses of antibiotics. We're used to telling patients to finish the entire course of antibiotics, even if they feel better. And many of us were taught that longer courses are needed to prevent relapse and limit resistance. Now more experts say shorter is better. Longer courses are actually MORE likely to lead to resistance...partly by increasing our normal flora's exposure to antibiotics. Plus shorter courses often work as well for many infections.'

Click “Letter” from the main menu, or an article from the homepage to read the issue.

Easily change articles with the left-hand table of contents.

# CE-in-the-Letter

The screenshot shows the 'CE ORGANIZER' section of the website. It displays a quiz titled 'Pharmacist's Letter: November 2016; Vol: 32, No. 11'. The quiz summary states: 'This course is designed to take ONE hour to complete. This includes the evaluation which follows the quiz questions. Please select an answer for 1, 2, 3, 4, 5, 6, 7, 8.' Below the summary are two questions with multiple-choice options. Question 1 asks about the duration of antibiotic therapy, and Question 2 asks about the new sublingual nitroglycerin powder for acute angina. A 'Submit Answers' button is visible at the bottom of the quiz area.

Click “Take Quiz” from the Letter, or use the CE & Training section from the main menu.

Simply answer the questions in order and click “Submit Answers” for completion.
