articulate, Cp, jive, moodle, D2L, Bb

VIDIZMO Products

EnterpriseTube

Enterprise video portal & streaming media solution for organizations with large-scale digital media needs that require security, compliance & scalability to stream live and on-demand video over public, private, & bandwidth-congested enterprise networks, with single sign-on and enterprise application integration. EnterpriseTube offers an easy-to-use video portal accessible to internal and external viewers for live webcasts, corporate communication, knowledge sharing, training, learning, as well as sales and marketing commercials. Recognized as a Challenger in Gartner Magic Quadrant for Enterprise Video Content Management, EnterpriseTube provides complete control over content access rights management such as individual content viewing permissions, personalizations, content segregation across various viewer groups, as well as the ability to search and find spoken words inside videos through machine transcription.

Virtual Academy

Perfect for medium and large enterprises interested in self-paced, interactive and gamified learning for employees, prospects, customers, and partners to compete with peers and receive recognition for accomplishments. Virtual Academy is a corporate video training and learning platform that combines enterprise video streaming with other digital assets to disseminate training videos, courses, and certifications.

Digital Evidence Management

Built on Gartner-recognized Enterprise Video Content Management System, VIDIZMO Digital Evidence Management Solution enables law enforcement agencies to store, manage and analyze ever-increasing digital evidence collected from body-worn cameras, dashcams, CCTV cameras, phone call recordings, etc. -- all while observing the chain of custody requirements. Redaction provides necessary identity protection to comply with various laws such as Freedom of Information Act. Machine generated transcription converts spoken words into searchable and indexable text, thereby speeding up evidence processing by avoiding long delays involved in human translation.
