Avamar Backup Service

Remote backups powered by ReliaCloud®

Using EMC's Avamar technology, OneNeck® IT Solutions is offering remote backup to complement its existing ReliaCloud® services.

OneNeck ensures that customer data is protected and available in case primary systems are not available. Combined with ReliaCloud compute, network and primary storage resources, Avamar remote backup is the enabler of more cost-effective and robust disaster recovery solutions.

Avamar is easy to install and works seamlessly with your existing infrastructure.

How it Works

- Install Avamar on the necessary servers in your environment.
- Allow Avamar to connect back to a ReliaCloud hosting center.
- Avamar will begin to back up your data off-site and retain it for the period you have specified.
- Use the Avamar client to control the data sets being backed up and we'll inform you of important backup events or failures.

Avamar Off-site Grid Replication

Also available from OneNeck, customers can replicate their primary Avamar systems to an off-site Avamar grid target in a ReliaCloud hosting center. This allows customers to continue to manage their primary Avamar systems and have the extra protection of off-site data replication. Again, the process couldn't be more simple.

How it Works

- Identify the OneNeck off-site Avamar grid as the replication target on the primary Avamar grid.
- Allow the Avamar systems to connect via the Internet.

- Backup data is written to the primary Avamar system then off-site to the Avamar grid.
- Continue to use the primary Avamar system as normal and OneNeck will notify you of important replication events on the off-site grid.

Why Invite Us to Join Your Team

As business becomes more complex and the pace of change continues to increase, information technology is more critical than ever before. Backed by TDS, a Fortune 1000™ company, OneNeck offers the perfect balance of world-class expertise and local service to help you transform your infrastructure into a strategic asset that creates a competitive advantage for your company.

What Makes Us Different?

OneNeck knows how to help you manage your IT systems productively, efficiently and economically. But more importantly, we design solutions that leverage your organization's business strategy for growth and success. As businesses compete in increasingly complex markets, OneNeck helps optimize IT resources to reach your company's peak performance.
