

SAP Hosting and Management

You run your business, we run SAP

Businesses may be founded on ideas, but they run on data.

With more data than ever at our fingertips about customers, supply chain, the competition, manufacturing and other business processes; it's critical to have the right ERP system in place. For many midsize businesses, SAP applications offer the power, security and functionality they need at an affordable price. However, challenges often arise in the management of an enterprise system. That's where we come in.

Supporting Superior Solutions

OneNeck® IT Solutions works with companies by hosting, managing, upgrading and maintaining SAP applications. We operate with proven best practices, actively monitoring the entire system to help you reduce costs, maintain transparency and improve data-driven decision making.

With unmatched expertise, proven experience and a long list of satisfied customers, we're well qualified to manage your SAP environment. In fact, OneNeck IT Solutions offers:

- SAP certified provider of hosting services
- End-to-end hosting of SAP environments , administration and technical support
- SAP technical upgrades
- OS and database support and upgrades
- High availability and disaster recovery
- Operational support through world class multi-tier help desk
- Certified SAP Netweaver administrators and technical resources locally

Since 1997, companies of all sizes and industries have relied on OneNeck for their strategic IT initiatives. Our extensive experience in ERP systems management helps them get the most

out of their IT investments, systems support, updates and migration paths. With significant in-house resources as well as a wealth of global ERP experience, OneNeck can handle ERP environments of any size and scope for a wide variety of businesses and industries.

OneNeck is an SAP certified provider of hosting services. Our partnership with SAP – as well as bolt-on solution providers of compliance, document management, workflow management and archiving systems – allows us to provide complete, flexible and customized solutions. Our customer-first delivery model enables our clients to maintain complex SAP environments on a cost-effective and predictable basis.

Our deep understanding of ERP systems and experience has led us to develop a proprietary decision tree model that we use to help our customers select the best migration path. Using this model, we deliver the optimum business value while minimizing the migration risk.

What Makes OneNeck Different?

It's all about intimacy. We get to know you and your business and only then develop strategies to manage your IT systems productively, efficiently and economically. We design solutions that contribute to your organization's growth and success. As businesses compete in increasingly complex markets, OneNeck helps optimize IT efficiencies to reach your company's peak performance.
