

SQL Database Management

We focus on your database so you can focus on the data that drives your business

Database management is complex, resource-consuming and requires expertise that must be constantly updated; plus it's critical to your success as a business.

Trust OneNeck® IT Solution's experienced SQL database administration team to pro-actively monitor and manage your SQL instance and databases to ensure peak performance 24/7. We can help you troubleshoot application and performance issues, as well as reduce costs by standardizing and optimizing routine tasks. Our proactive administration, monitoring, reporting, and around the clock support for your SQL databases, includes:

- Management of instances, databases, ERP application layers including Dynamics AX and third party applications (shoulder apps)
- Monitoring and reporting of key metrics
 - Database availability and SQL services
- Management and tuning the following areas within the database
 - Transaction log files and maintenance
 - Memory utilization/configuration
 - Table and index storage parameters and fragmentation
 - Database config options and storage parameters
 - Table statistics and deal with table locks/record contention
- Patching
- Code promotions
- Deployment of schema changes
- User creation and security management
 - Database authentication and encryption management
- Environment documentation
- Incident diagnosis and resolution
- Uptime SLAs

And best of all, our SQL database management solution can be tailored to fit your business's unique requirements.

In Good Hands

OneNeck's broad spectrum of solutions span the entire Microsoft SQL technology stack. As a Cloud Service Partner (CSP) with Microsoft, we possess deep industry and technical knowledge of Microsoft applications, specifically Microsoft SQL. Each of our certified DBA's have more than 10 years of experience with specializations in Multitenant, Always on Availability Groups (AOAG), Always Encrypted, Stretch Databases, Dynamic Data Masking, and JSON Support.

We design total solutions, one customer at a time. This configure to-order philosophy tailors every solution to each customer's specific situation. And, we're able to scale our SQL database solutions as your business grows. OneNeck fully understand the complexity of your SQL environment and will help you optimize your IT efficiencies to allow your company to reach its peak performance.

Not sure of the health of your current SQL database environment or its cloud readiness? Contact us today and take advantage of our SQL database assessment and health check service designed to uncover performance and configuration risks and evaluate your SQL database environment's readiness for the cloud.
