

Security Information and Event Management

Know when a security threat is in progress and respond in time to protect against it

The threat landscape is constantly changing. With introduction of new systems, applications, upgrades and devices on daily basis, it is important to have overall central visibility of your IT infrastructure.

OneNeck® IT Solutions Security Information and Event Management (SIEM) creates centralized visibility through best-of-breed tools to analyze and correlate potential threats within your network. Using proven methodologies, our security experts will assess your current business and technical needs and provide you with comprehensive solutions to your SIEM security. This includes full end-to-end solutions from architecture, deployment to review-type services related to SIEM and overall event management.

With a properly designed and implemented SIEM in place, you gain visibility into unauthorized access controls, system attacks and overall security posture within your network. SIEM allows you to protect your networks and achieve compliance requirements with device correlation and analytics from OneNeck.

The 100% Solution

Our SIEM services provide end-to-end custom solutions to meet your needs. From selecting and sizing best products and their licenses, to working with your staff on implementing and managing the solution tool sets, you get visibility, analyze your data and provide remediation. Our SIEM solution includes the following services:

- Architecture, feature selection and best placement Unified Communications Manager
- Installation and configuration
- Integration with your systems and applications
- Specific compliance requirements and reporting configuration
- Product training

Compliance

Common compliance standards require monitoring of security events, and SIEM is the best tool available for this. OneNeck's SIEM solutions are chosen and deployed with compliance reporting in mind to ensure they meet the requirements of your business and industry.

OneNeck Services

- SIEM consulting, technology strategy workshops and solution development.
- SIEM Design and Implementation for LogRhythm and complementary products.
- OneNeck Managed Services for network and security infrastructure.

Pricing and Scope

Pricing is calculated based on the size of the customer environment and specific customer requirements. This can include the number of sites, type of network devices to be integrated into SIEM, compliance and reporting requirements and others. OneNeck's security experts will work with you to customize your engagement based on your existing infrastructure and your specific needs.

Through proven methodologies, our security experts will assess your current business and technical needs and provide you with comprehensive solutions to your SIEM security.
