

OneNeck for Higher Education

Is it time to digitally transform your student experience?

It has become widely accepted that any modern organization needs a digital strategy if it is to achieve its business objectives, and today's universities are no exception. Private sector companies are rapidly implementing digital strategies, a must to remain competitive, and government agencies are following suit in order to reap the benefits of increased efficiencies and economies of scale that delivering services in new and differentiated ways brings. These factors are equally important to a modern university seeking to increase the size of its student body, and increase research participation, through enhanced brand and academic excellence.

At OneNeck we understand that universities, like any business, need to effectively manage their resources and costs, and digital technology has a key role to play in their success. But, first and foremost, universities exist to provide students with an optimal learning experience and to support research programs that are striving to make an impact on the world. In doing so, they must seek to provide an excellent experience for students and researchers, and this depends on having the right environment supported by the best technology solutions.

What do OneNeck solutions help educational institutions do?

Cloud: Reap the benefits of cloud and better meet students' high expectations with cloud-hosted services that enhance the learning experience.

Managed Services: Free university IT staff to focus on strategic initiatives while ensuring important educational services remain available.

Collaboration: Provide the tools to enable global collaboration that facilitates learning and teaching with peers and experts worldwide.

Security: Know that critical data is safe with multi-layer protection that meets compliance standards while enabling modern learning.

Colocation: Ensure regulatory compliance with a highly secure connection into OneNeck's top-tier data centers.

Advanced IT Services: Take advantage of a full range of IT consulting expertise, including assessments, design, implementation and hands-on training.

Mobility: Enable students to learn from anywhere by providing access to educational resources, regardless of location or device.

Hardware & Software: Procure the hardware and software that powers higher learning, from best-in-class, transformative partners.

Why OneNeck

OneNeck has expertise leveraging a broad range of technologies and services that will help you operate more efficiently. We provide an end-to-end, technology-independent approach that includes a large portfolio of hybrid IT offerings across infrastructure, cloud, data center, applications and managed services. This approach enables higher education organizations to transform their services, improving the overall student experience.
