

Top 9 Reasons to Move to IaaS

01

Cost Effective -
Don't buy, maintain or upgrade software, hardware, or operating systems

02

Scalable & Flexible -
Respond quickly to changing opportunities and requirements

03

Security -
Have a higher level of security than with your own data center

04

Time to Market -
Ramp up and get the job done quicker than the competition

05

Less Pressure -
IT staff no longer is responsible for everything

06

Manageable from Anywhere, Anytime -
Web-based administration provides added agility

07

No More Upgrades -
Upgrading the equipment is now the provider's responsibility

08

Focus on Growth -
Don't waste time on technology decisions

09

Support for Disaster Recovery -
IaaS provides a consolidated DR infrastructure
