

Keep moving forward.
We got your back.

The modern IT landscape is often uncharted territory

— you thrive in that kind of environment. You feed off of exploration — it's a characteristic of all great IT leaders. You search for solutions where others don't, and you won't stop until you find the one that keeps your business moving forward. So naturally, when a new hurdle appears, you're the first one up the mountain. You've got a vision for how to get your team there, you just need the manpower, people you can trust, whether it's to offer support and guidance or keep existing systems and applications running.

We embrace our role in this expedition. We provide hybrid IT solutions, services, and skilled resources that span on-premise infrastructure to the cloud, and that fit into the complexities of your IT landscape. Allowing you and your key staff to focus on new initiatives integral to the growth and modernization of your business.

OneNeck has your back with securely architected hybrid IT solutions.

At OneNeck, we embrace a Hybrid IT approach. Because the fact is, not all workloads are ready or suited for the cloud. Our customers often operate in mixed environments incorporating public and private clouds along with the traditional, on-premise data center, which is why we designed our portfolio specifically to help technology leaders bridge the gap between legacy IT infrastructure and modern cloud infrastructure.

Multi-Cloud Services and Solutions

The cloud brings faster innovation, flexible resources and economies of scale. But with multi-cloud solutions comes complexity. OneNeck is here to help you determine the best fit for your workloads and successfully migrate and optimize your cloud services and solutions.

Microsoft Azure: hybrid cloud, backup and cloud security

Microsoft O365/M365: backup, security and MFA/SSO

OneNeck's ReliaCloud: public and hosted private options, flexibility and dynamic response to change in demand

ERP and Managed Services: Enterprise Resource Planning (ERP) and application management solutions, Oracle DB, SQL DB, MS Dynamics AX and Oracle EBS

Security

Staying ahead of the latest security threats is a full-time job. We work with you to identify the security risks unique to your business, develop a prioritized strategy to mitigate that risk, and implement a plan protecting you from future attacks.

Basic Security Services: Controls, vulnerability scan and inventory

Foundational Security Services: Next-gen antivirus, next-gen firewall and endpoint protection

Organizational Security Services: Security analytics, behavior analytics and web security

vCISO: Cost-effective virtual CISO that lends security expertise and helps mitigate risk

Digital Infrastructure

We only work with proven technology vendors. Going to great lengths to evaluate our partners and become experts in their products, to ensure you find what works for your infrastructure.

Collaboration: We provide world-class collaborative services for conferencing, contact centers, endpoints and hosted UC that bring people together enabling extraordinary things.

Data Center Networking: Core route/switch and software-defined solutions.

Access Wired/Wireless: Wired and wireless network options ensuring continued network accessibility.

Converged/Hyperconverged: Converged and hyperconverged systems that simplify network management and scale when you need to grow.

Servers & Storage: Data center infrastructure based on proven architectures and technologies.

Security: End-to-end security solutions from the firewall to end users.

Data Center & Colocation

OneNeck maintains eight strategically located data centers. From turnkey data center services to colocation, we can create your hybrid, high-availability environment, where you need it.

Services to Meet Your Unique Needs

Advanced IT Services

Assess, Advise, Migrate, Implement, Adopt and Optimize. All of our solutions are backed by advisory and professional services lead by our team of seasoned experts.

Managed Services

Having an effective IT environment is only half the battle. From managed applications to databases, networks and servers, our team can provide you with the support to get the most out of your investment while allowing you to focus on your most strategic initiatives. Our managed services include backup/DR, collaboration, database, enterprise applications, network, security, storage and systems.

OneNeck is a subsidiary of Telephone and Data Systems, Inc. which provides wireless; cable and wireline broadband, TV and voice; and hosted and managed services to approximately six million customers nationwide through its businesses U.S. Cellular, TDS Telecom, OneNeck IT Solutions LLC, and TDS Broadband Service LLC.
