iCMP MPOS

## TAKE PAYMENT WHEREVER YOUR BUSINESS TAKES YOU

Whether you're a freelancer, startup or a growing small business, Global Payments' iCMP MPOS solution can help you increase sales, improve cash flow and enhance customer satisfaction.

iCMP MPOS is a convenient and secure payment solution that transforms any iOS or Android device into a powerful payment platform, offering full EMV and contactless credit and debit card acceptance.

The iCMP MPOS is small in size, but big on features. Process transactions, manage customers, load inventory and get valuable, real-time insights into your operations with real-time transaction detail reporting available through our online merchant portal. With its state-of-the-art security standards such as EMV Level 1 and 2 and PCI PTS 3.1, the iCMP MPOS solution securely processes transactions, ensuring that sensitive data is never present on your mobile device.

With iCMP MPOS you can manage your business on-the-go.
