

Follow the steps to below to ensure your files have the correct settings for printing your next project with PrintingCenterUSA. Note: these steps are for Photoshop on a Mac. Windows/PD steps may vary slightly.

## Step One: Sync our Color Settings

This helps ensure that what you see on your screen will have the same colors when printed.

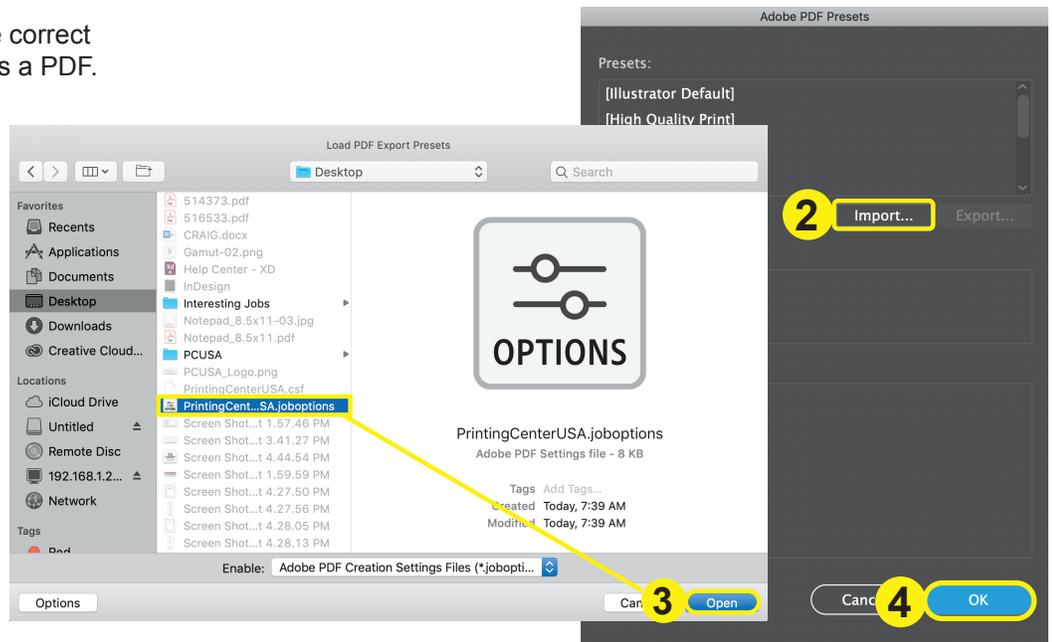

1. Launch Adobe Photoshop
2. Go to the “Edit” menu and select “Color Settings”
3. Click the “Load...” button
4. Navigate to the Color Settings folder included in the download and select the “PrintingCenterUSA.csf” file and click “Open”
5. Click “OK”

## Step Two: Sync our PDF Preset

This helps ensure that you have the correct settings when you export your file as a PDF.

1. In Photoshop, navigate to Edit > Adobe PDF Presets > Define
2. Click “Import”
3. Navigate to “PrintingCenterUSA.joboptions” Open.
4. Click “Done”

## Using our PDF Settings to Save your PDF

1. When your design is complete, in Photoshop, go to File > Save As
2. In the Save As dialogue box, select “Photoshop PDF” in the Format dropdown
3. Click “Save”
4. In the Export PDF dialogue box, choose “PrintingCenterUSA” in the Adobe PDF Preset Dropdown menu.
5. Click “Save”
