

# What is EHSQ digitalization ?

Digital is impacting on EHSQ functions. Beyond a digital transposition of traditional tools (paper forms, spreadsheet ...), digital transformation brings new uses related to mobility, real time, interfacing possibilities, exploitation of DATA . On top of everything: performance gains at all levels of the organization.

## How can digital help?

(Examples with the EHSQ service of the company "Process")

- Manage the **Quality Documentation** and have a browsing history;
- Carry out **my supplier audits** on tablet and automate **my reports**;
- Simplify the logging of **nonconformities with pre-filled data**

- Follow **the Global Action Plan** in real time
- Save time **in process reviews**
- Have **monitoring indicators** on my smartphone
- Mapping **the strategic positions** of the company

- Conduct **my EHS supervision tours** on tablet
- Prepare the media and lists of participants for **my EHS talks**
- To be assisted during **incident reporting with recommendations based on algorithms ...**
